PART - d

1.

a. Business Economics is the branch of Economics it uses Economic Principles to solve business issue and aid to decision making is known as business Economics.

6. Marginal technique

2. Average technique

3. Revenue technique

d. It shows the market situation how prices rises and demand falls.

e. Economics of scale it is benideted to the business when it produce large scale of goods and services.

d. Monopolistic market

g. GDP : Aggregate value of goods and services produce within the domestic territory of a country is known as GDP.

NDP : Aggregate value of goods & services

Produce within by the country and less depreciation charges is known as NDP.

$$GDP = C + I + G + X - M$$

$$NDP = GDP - \text{Depreciation Charges}$$

PART - B

3.

Consumer Equilibrium: Satisfy the consumer need and want & Purchasing Power of Commodity [Utility] is known as Consumer Equilibrium.

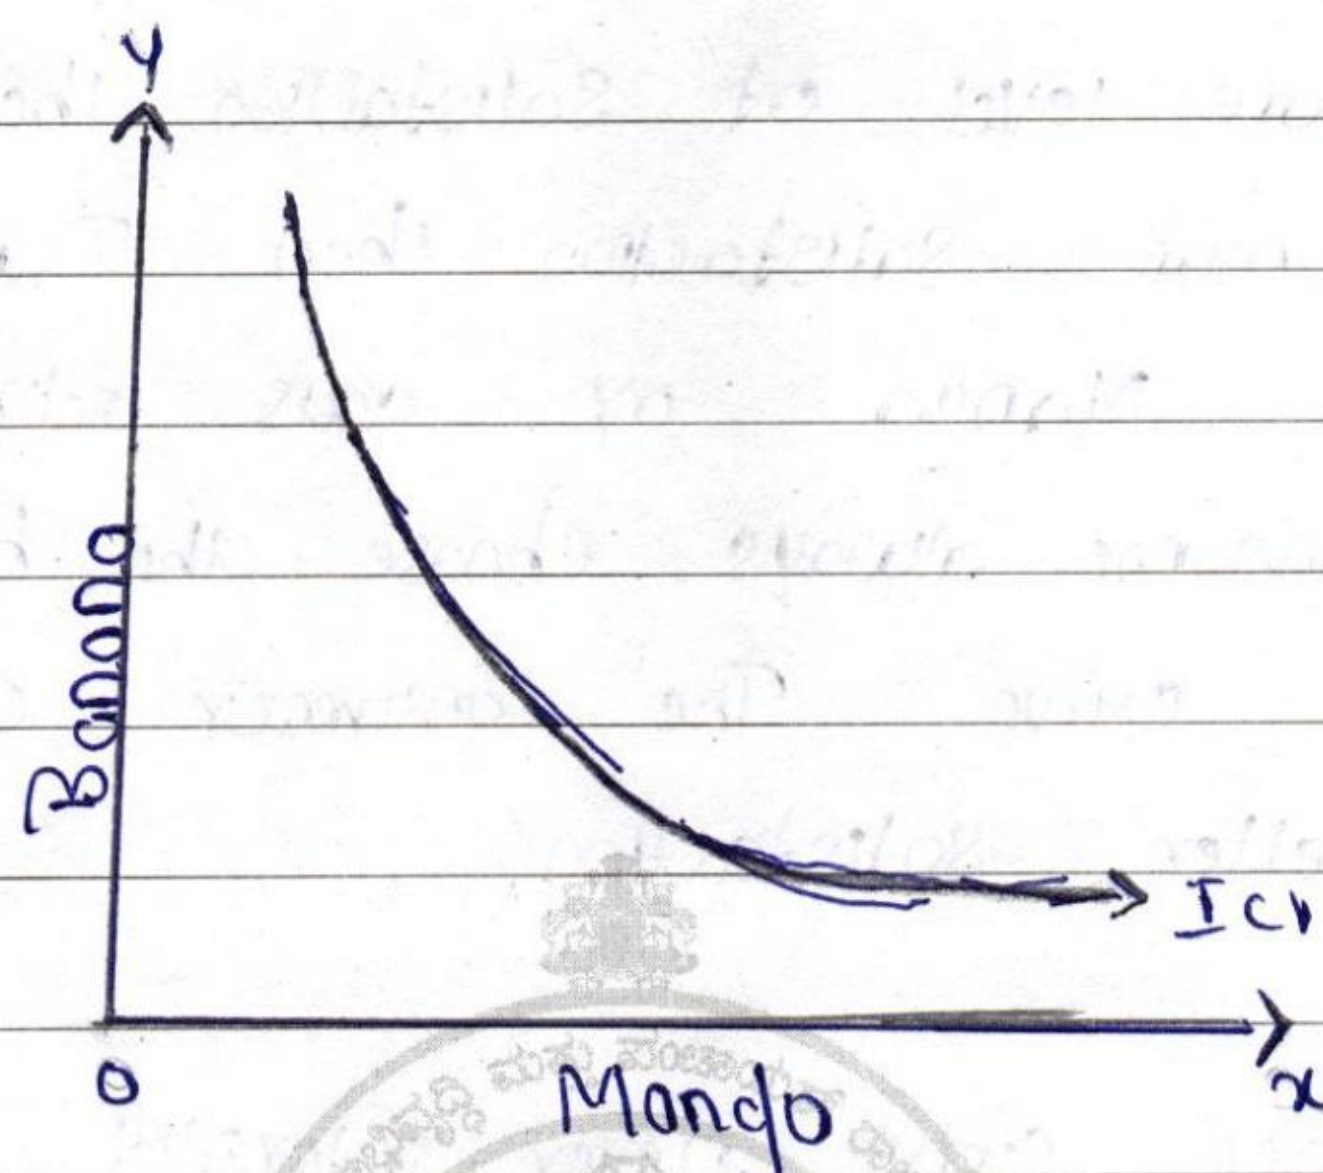

Indifference Curve: All possible combination of two goods of different commodity which satisfy the consumer is known as Indifference Curve.

Features of Indifference Curve.

1. Indifference curve slope downward from left to right
2. Indifference curve provide higher level of satisfaction
3. Indifference curve never intersect each other
4. Indifference curve never touches x axis
5. Indifference curve convex to the origin

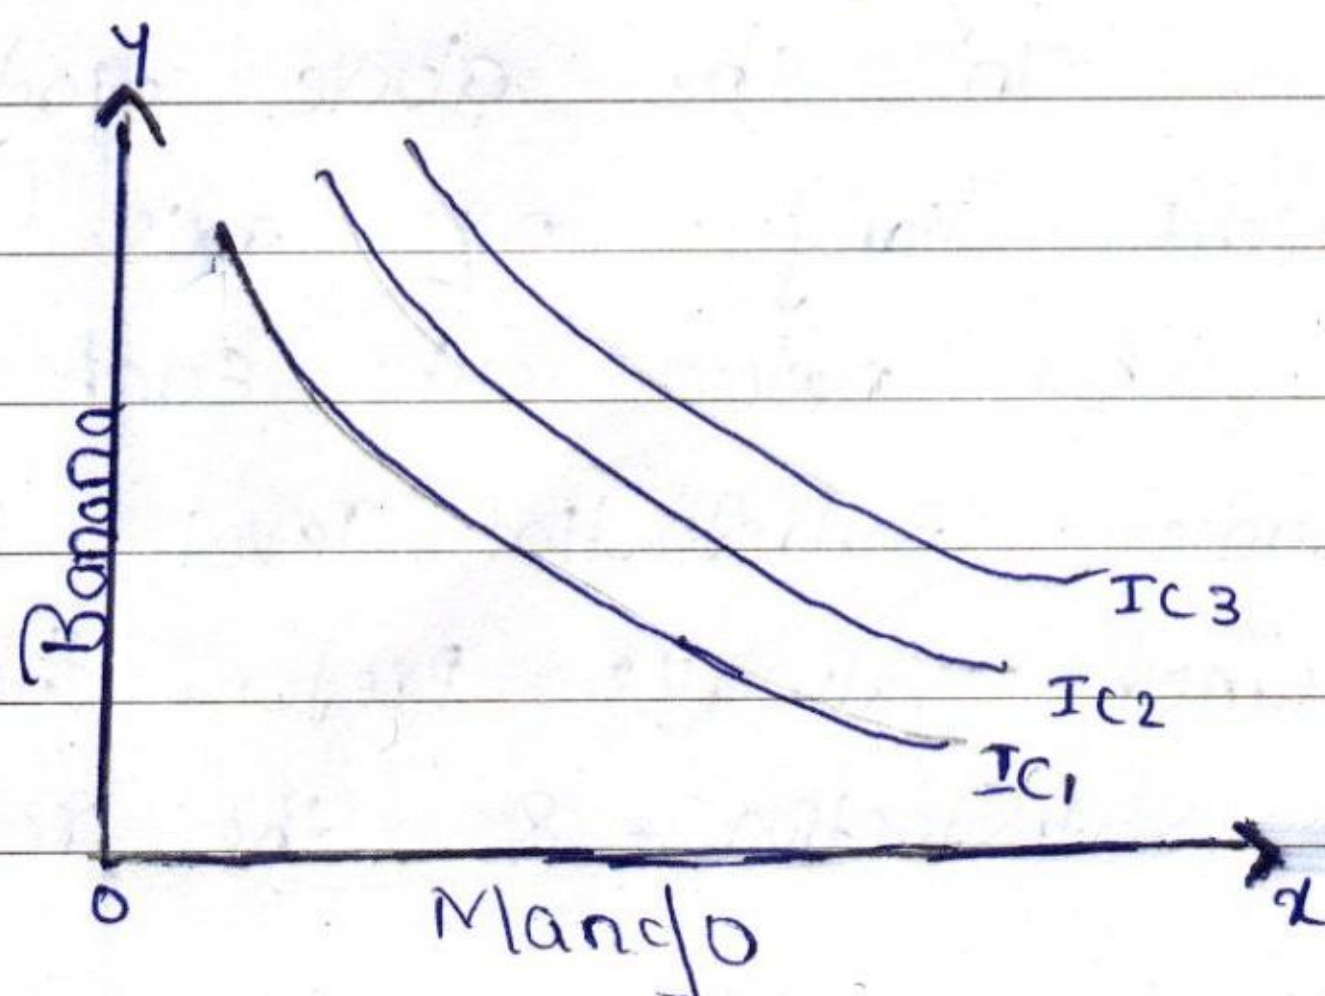

29541

1. Indifference curve slope downward from left to right:

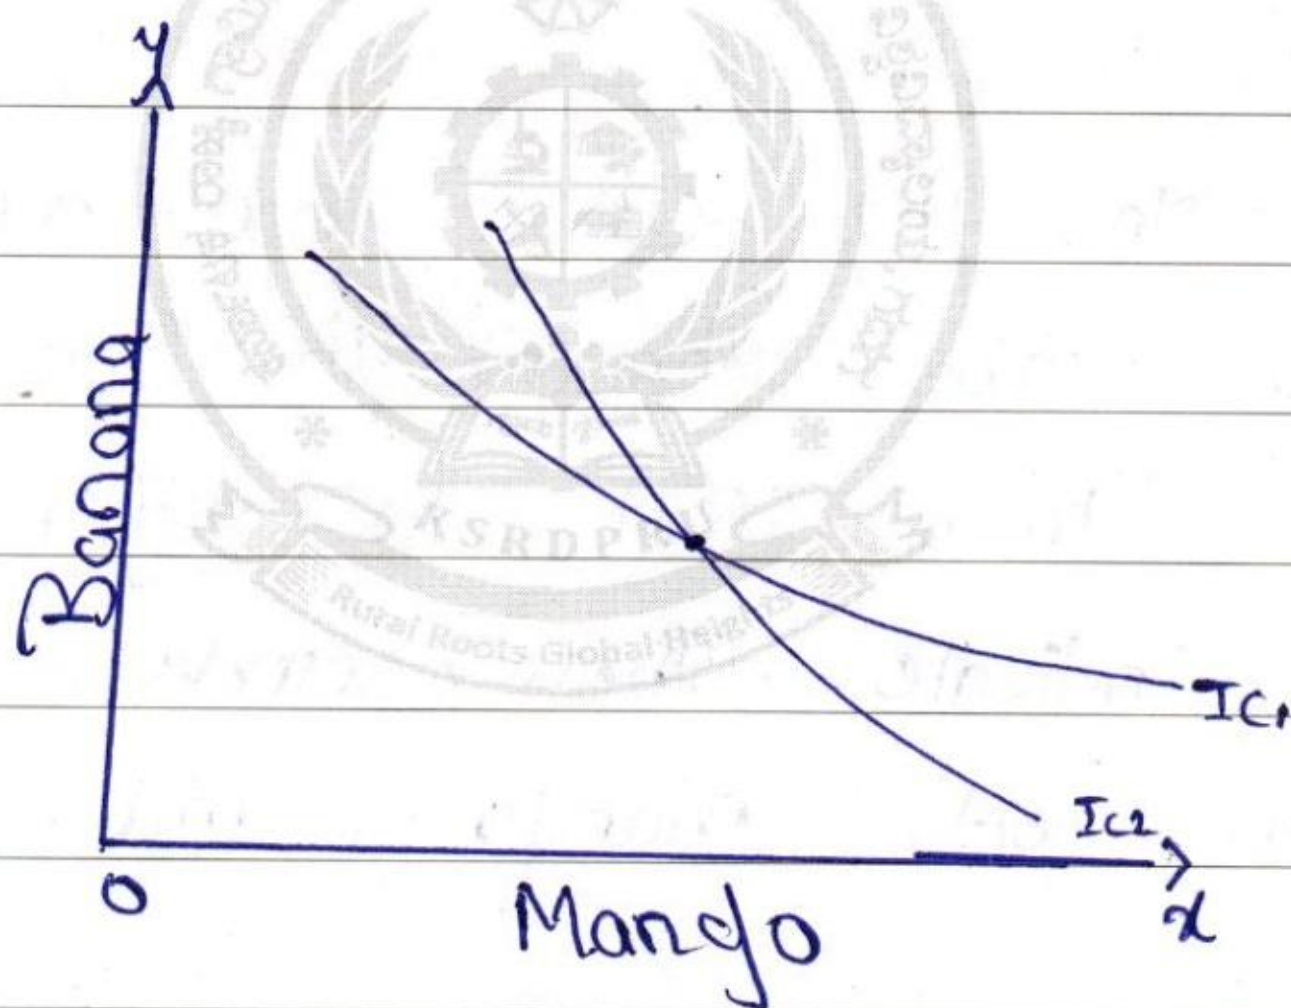

In the curve Ox axis represent Mango and Oy axis represent the banana. It slopes downward from left to right because it has a negative slope. This curve shows the two combinations of mango and banana.

2. Indifference curve provide higher level of satisfaction.

In the above diagram there are Three [3] indifference curve IC_1 , IC_2 and IC_3 . IC_3 give more level of Satisfaction than IC_2 , IC_2 provide more Satisfaction than IC_1 , on axis represent Mango or axis represent Banana. The consumer always choose the highest level of Indifference curve. The consumer choose IC_3 to get better Satisfaction.

3. Indifference Curve never intersect each other.

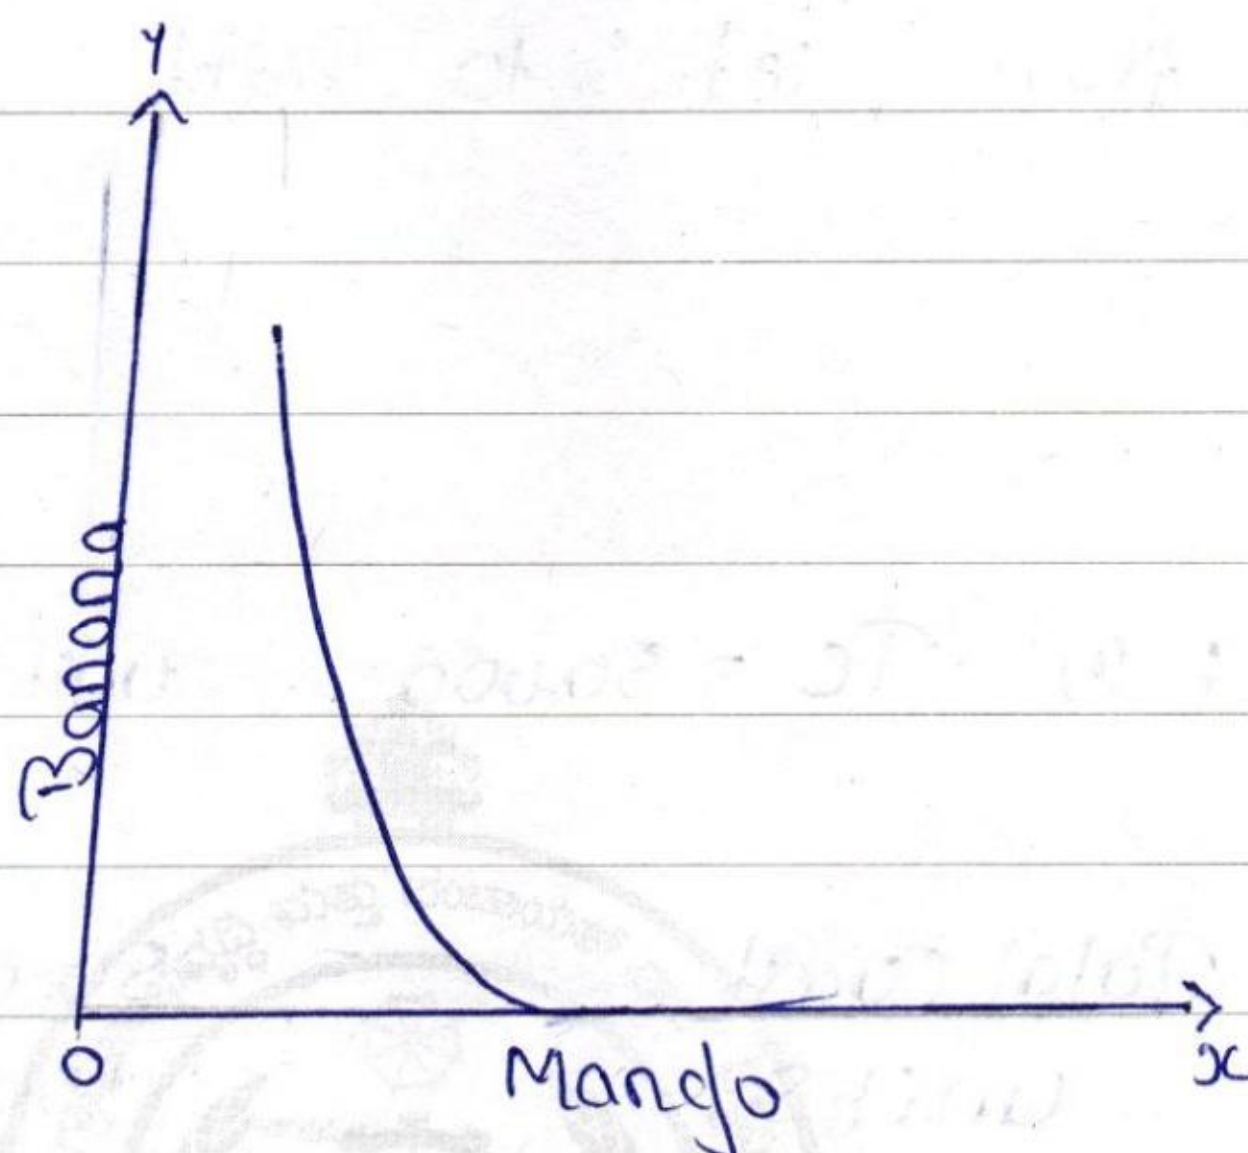

In the above diagram on axis represent Mango or axis represent Banana. and It never cut each other because consumer Satisfaction level is high the consumer always prefer the higher level of Satisfaction so the reason they never

29541

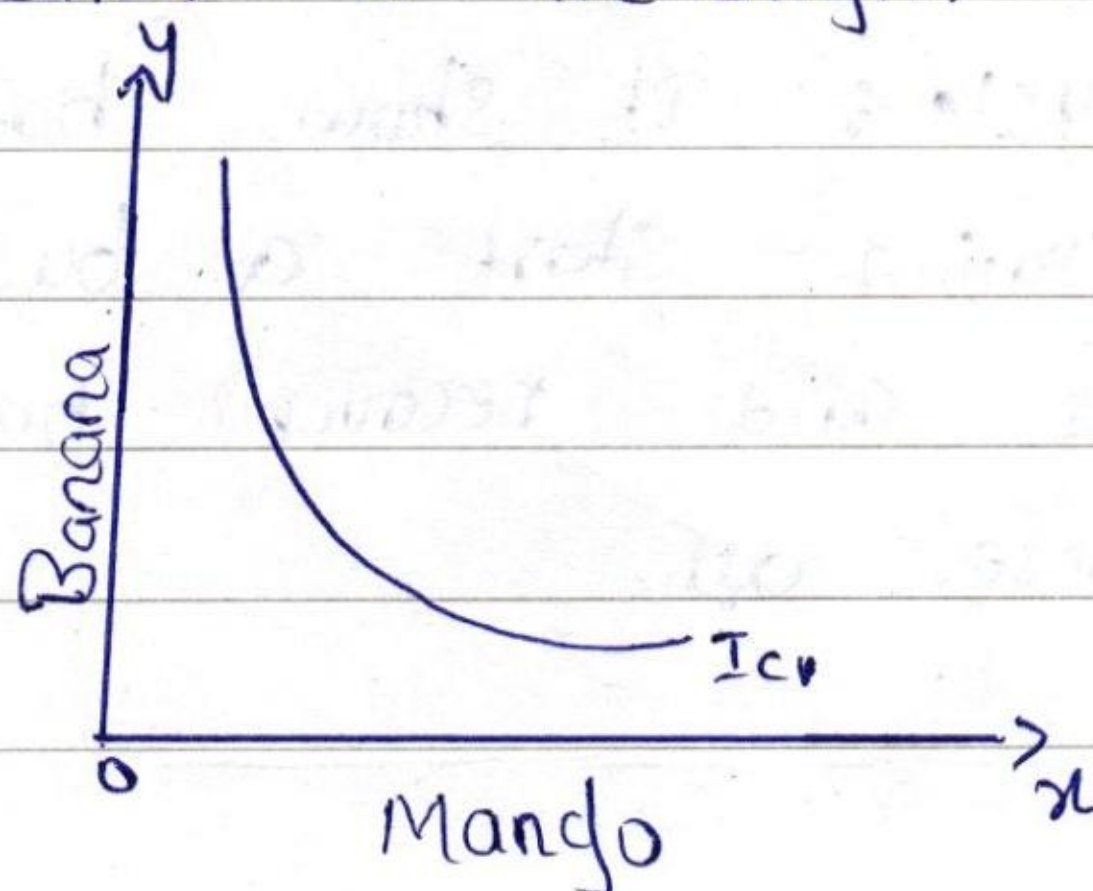

cut or intersect each other.

4. Indifference curve never touch ox axis.

ox axis represent Mango oy axis represent Banana and it never touches x axis because the satisfaction level of consumer is high it never come down so it never touches x axis.

5. Indifference curve Convex to the origin.

29541

OX axis represent Mango OY axis represent Banana It has convex to the origin to the curve is smooth and slope downward from left to right.

5.

Given

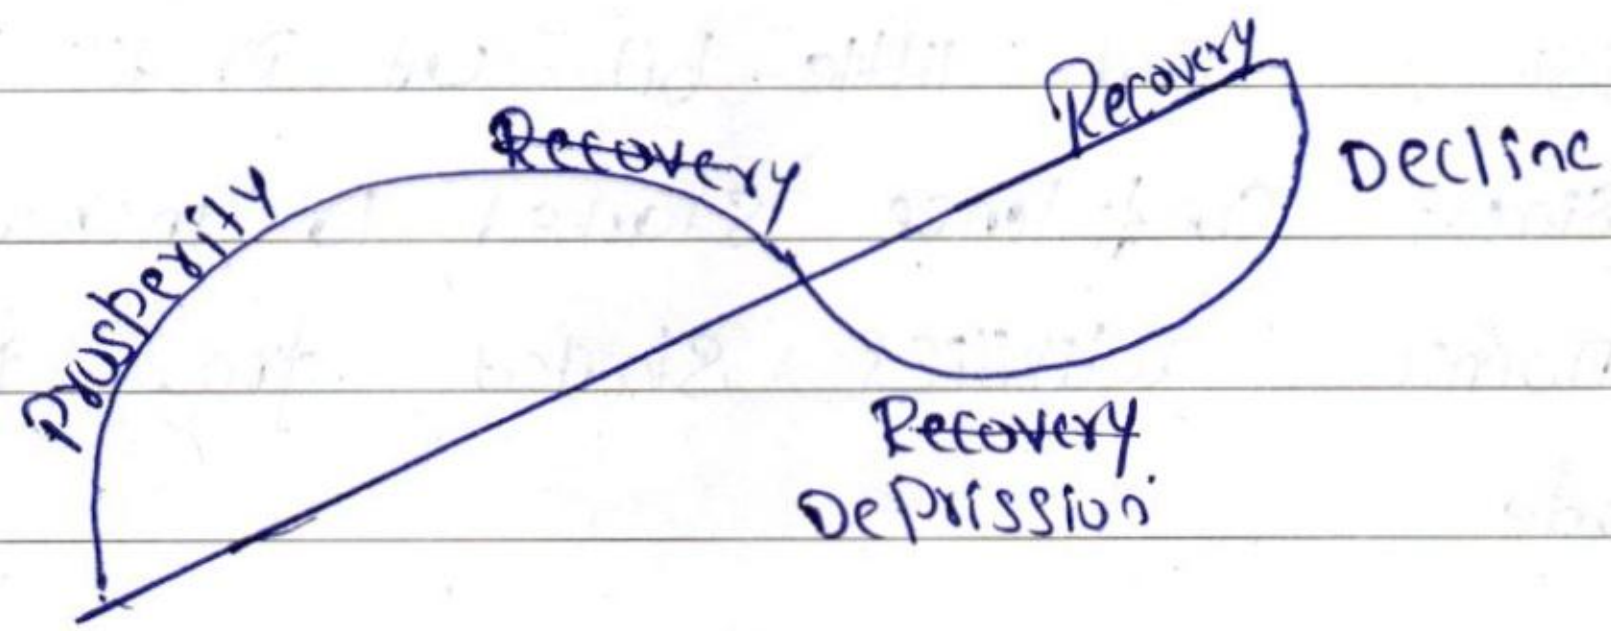

Step : ① $TC = 50,000$ units = 1,000 $20 = 0.20$

$$\frac{\text{Total cost}}{\text{units}} = \frac{50,000}{1,000} = 50$$

Step : ②

$$\begin{aligned} \text{Selling Price} &= \text{Cost Per Unit} \times 1 + [\text{Profit margin}] \\ &= 50 \times 1 + 0.20 \\ &= 50 \times 1.2 \\ &= 60 \end{aligned}$$

6. Business cycle : It shows how the company or organisation start a business how they bear losses and recover how they earn profit these all.

4. Decline:

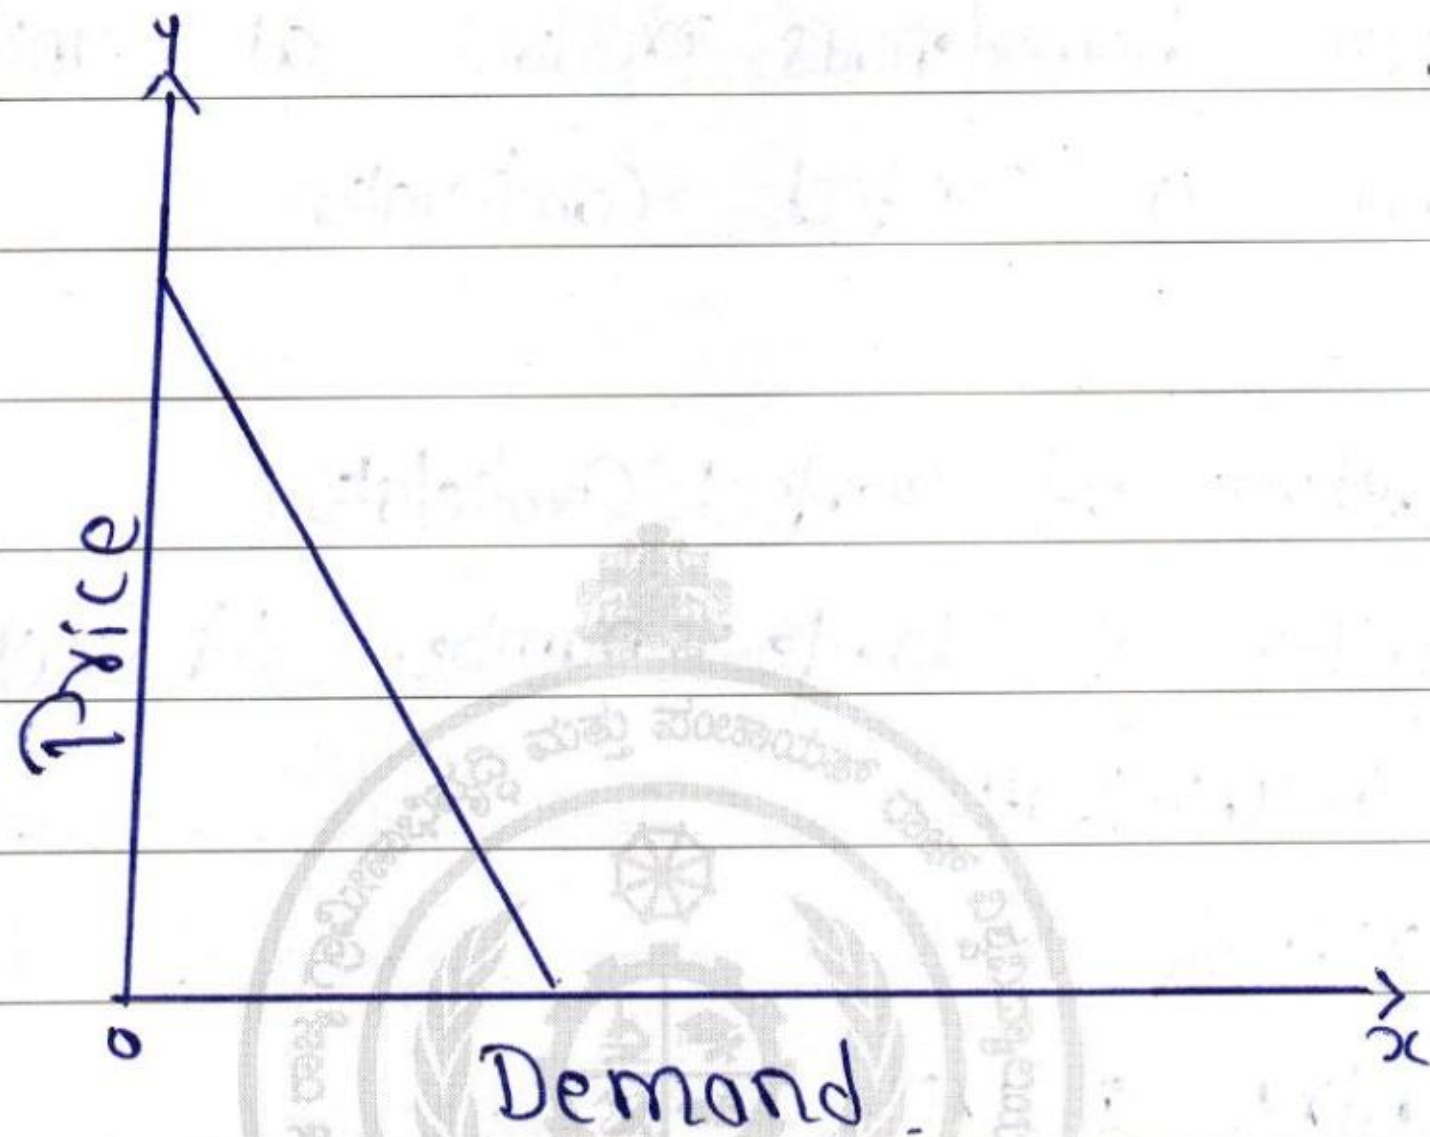

- * Economic activities decreased
- * Business not earn the profit. He faces the heavy loss
- * Business confidence is very low
- * The organisation loose hope and ~~think~~ "to close the business."

7. Law of Demand: The quantity of a demand increases the price decreases. The demand decreases the price increases is known as demand.

Assumption

1. Price factor
2. Slope downward from left to Right
3. No change in consumer preference & taste

4. No change in Consumer Income
 5. No change in Population
 6. No change in the Price of related good
- * .

or axis represent Demand or
 axis represent Price it slope downward from
 left to right. It has inverse relation between
 -n Price and demand. When the Price rises
 the demand fall. When the demand rises the
 Price fall.

PART - C

9.

Perfect Competition: In these market one seller and large number of buyers they sell their homogenous product at uniform price is known as Perfect Competition.

Characteristics of Perfect Competition.

1. one seller & large number of buyers
2. Profit maximization
3. No Restriction on
4. free entry & exist
5. Homogenous Product

1. One Seller & large number of buyers: In the Perfect competition here only one seller and he sell the goods at uniform price

2. Profit maximization: here he started the business with the view to earn more profit and grow the business

3. No restriction: here the government will not interfere.

4. Free Entry and Exit: Here no rules regulation. In the perfect competition existence of new firm is allowed.

5. Homogeneous Product: They sell their product at uniform price to earn profit they started business with the view to earn profit.

2. Monopolistic Competition: Many sellers and large numbers of buyers. Here all the goods & price rate are the same they sell same product.

1. Many Seller large numbers of buyers

2. They sell same product of goods

3. Analogies.

4. Profit maximization

5. Free Entry & Exit.

1. Many Seller large number of buyers: Here the seller sell same product at same price. In the monopolistic market they sell many same products.

2. They sell same product or goods here the price of the goods & services in all the shop the price remain constant.

3. Profit maximization: here they not view to earn profit

4. No Restriction: New firm exists in the monopolistic market. It has free entry and exists.

3. Oligopoly Market:

one seller large number of buyers they sell homogenous product at uniform price is known as oligopoly market.

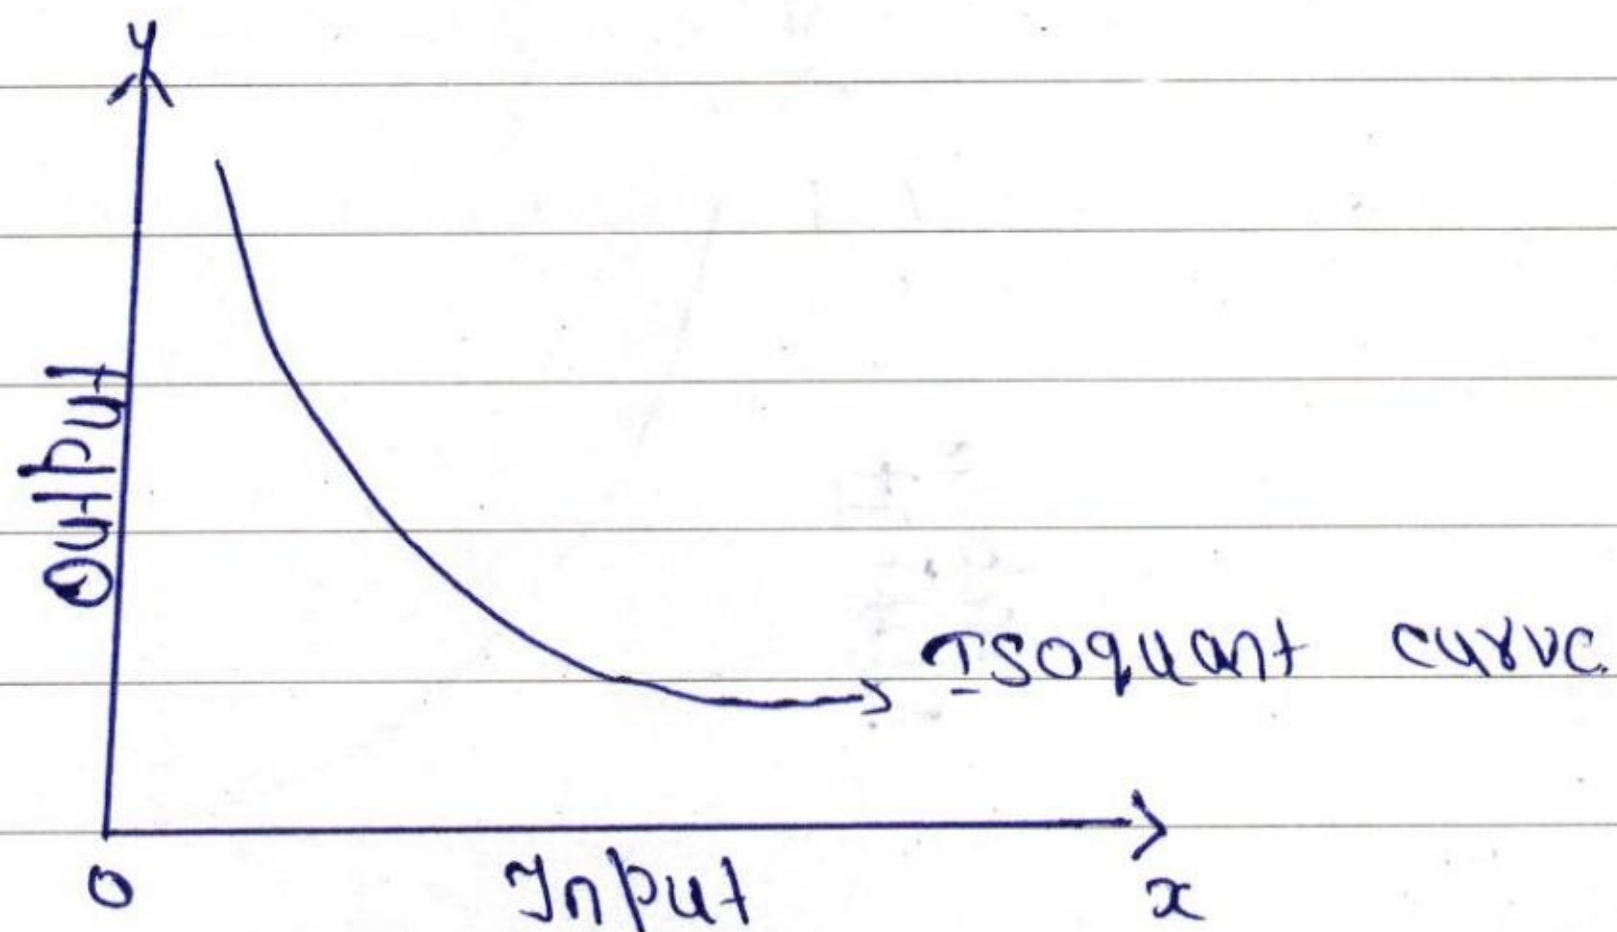

Characteristic of oligopoly.

1. one seller large numbers of buyers
2. profit maximization
3. No free entry & exist
4. Homogeneous product

1. One seller & large numbers of buyers: In the oligopoly single seller sell all the good and there are large numbers of

buyers

2. Profit maximization: They started a business with the view to earn more profit and achieve their goals.
 3. No free entry & exist: Here the new firm is not allowed to enter in the market.
 4. Homogenous Product: In oligopoly market they sell homogenous product only at uniform price.
12. Isoquant: All the set of possible combination of input which provide same level of output is known as isoquant.

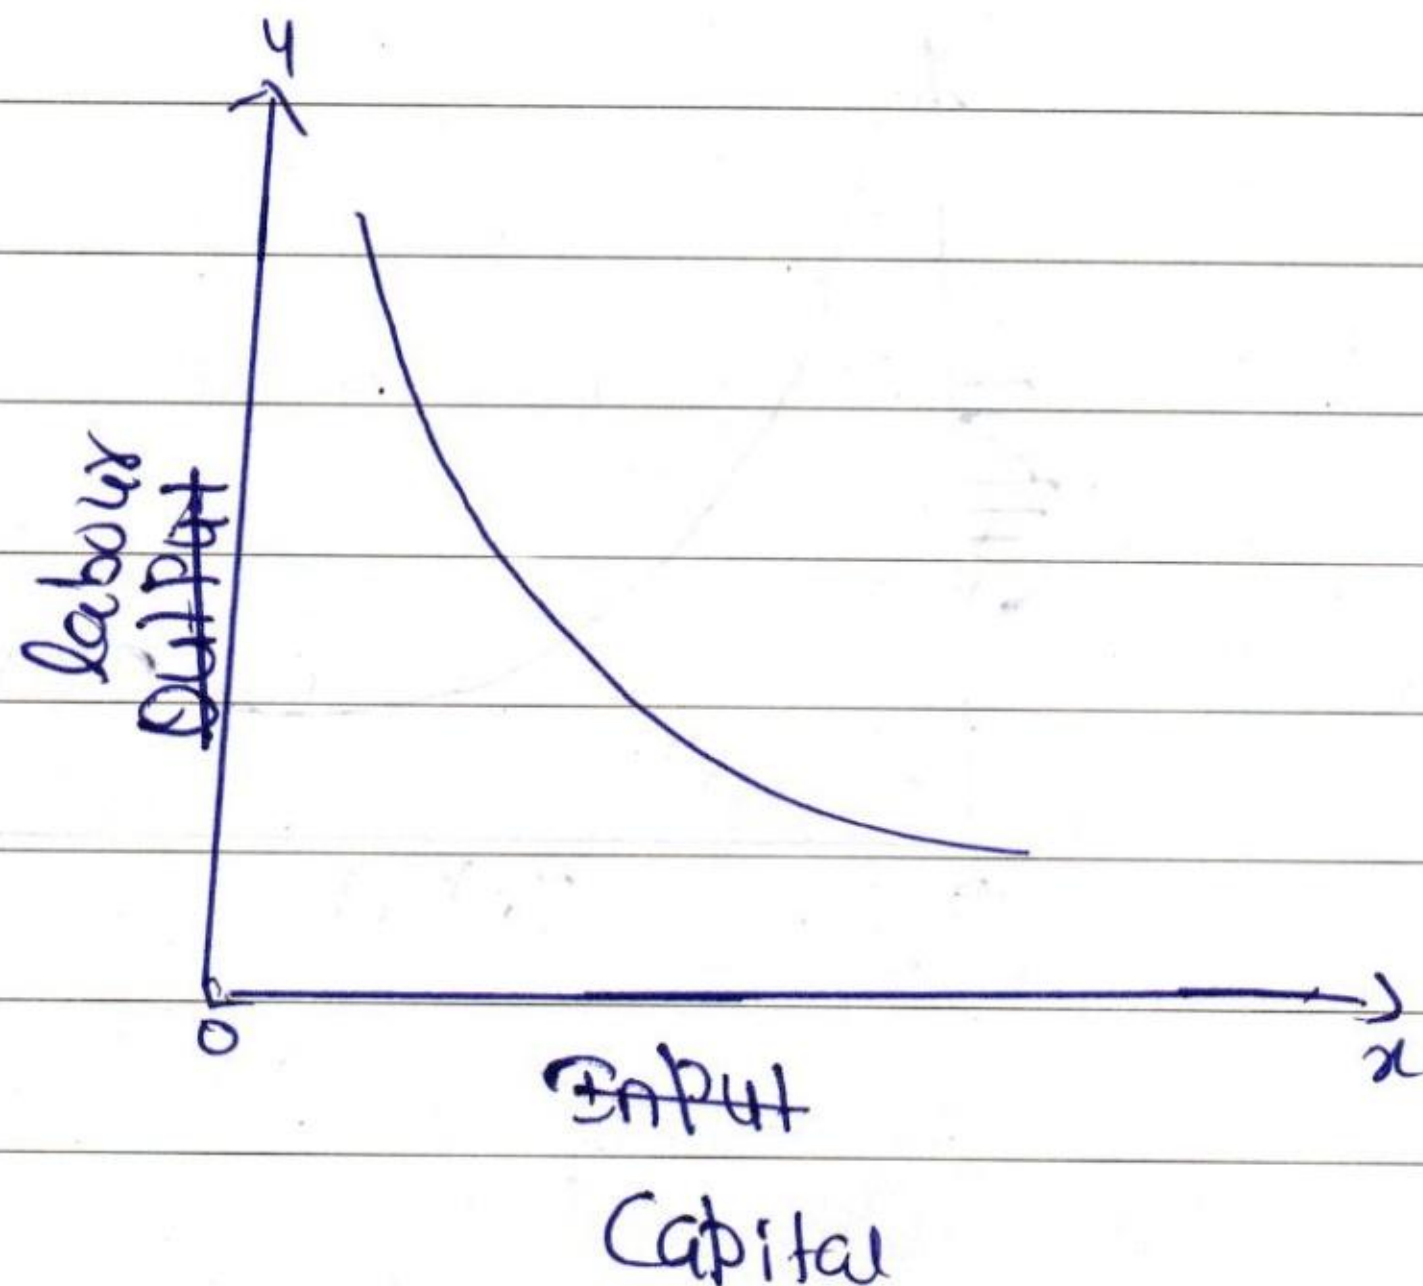

Assumptions

1. 2 divisible factor
2. 2 factors of Production
3. Efficient use of resources
4. 2 MRTS

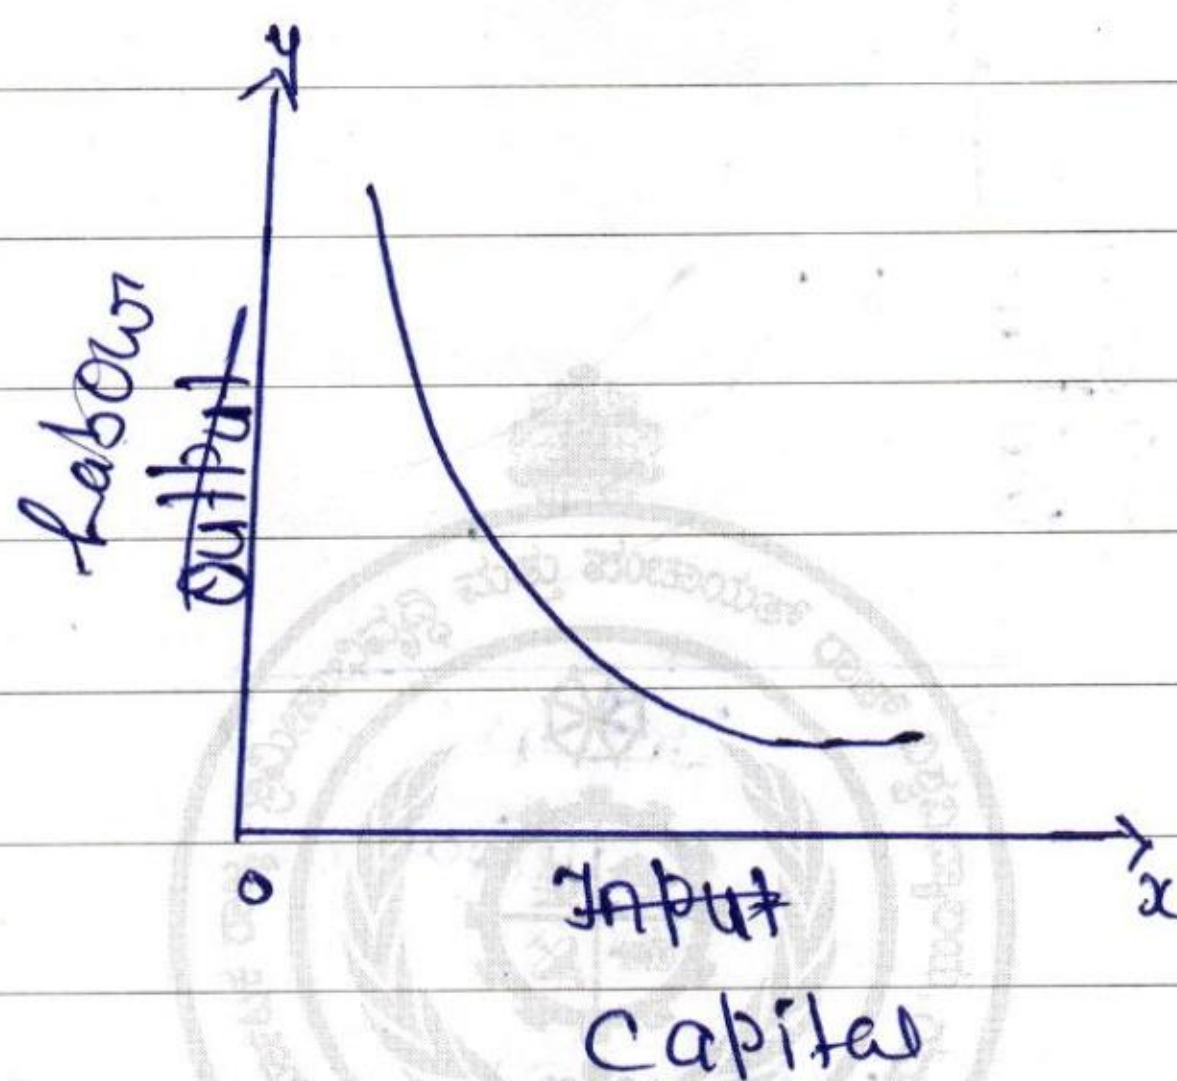

Properties of Isoquant:

1. Isoquant curve slope downward from left to right
 2. Isoquant curve convex to the origin
 3. Isoquant curve provide higher level of satisfaction
 4. Isoquant is not parallel to each other
 5. Isoquant curve never intersect each other
 6. Isoquant curve has oval shaped
 7. Isoquant curve never touch x axis
1. Isoquant curve slope downward from left to right

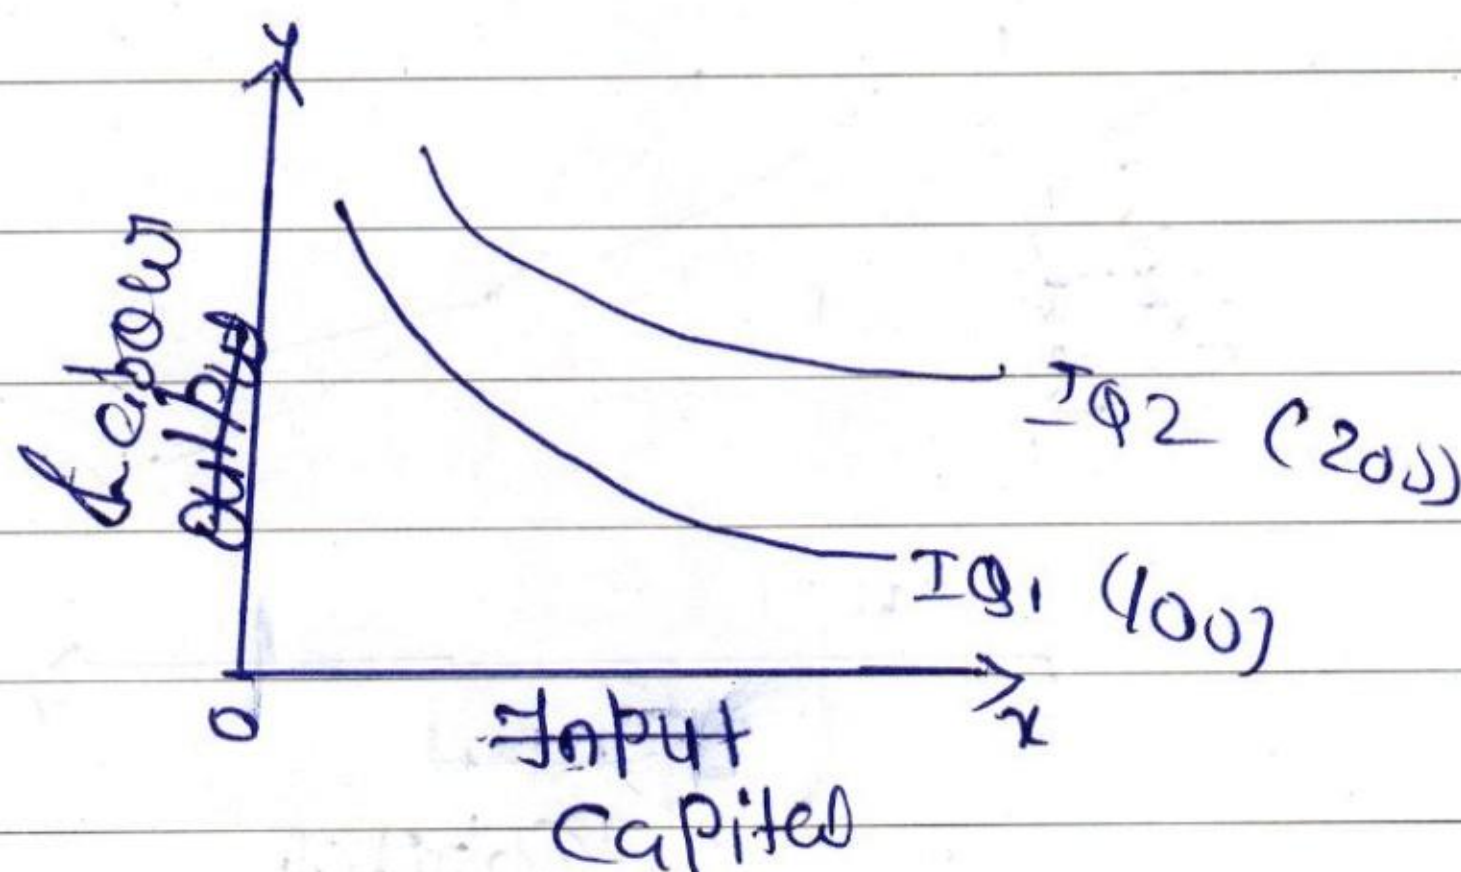

or axis represent input or axis represent output It has downward sloping curve negative sloping curve It has right indicates

2. Indifference Isoquant Convex to the origin.

due to Marginal Rate of Substitution when the two factors are substituted, a single input can't be produce,

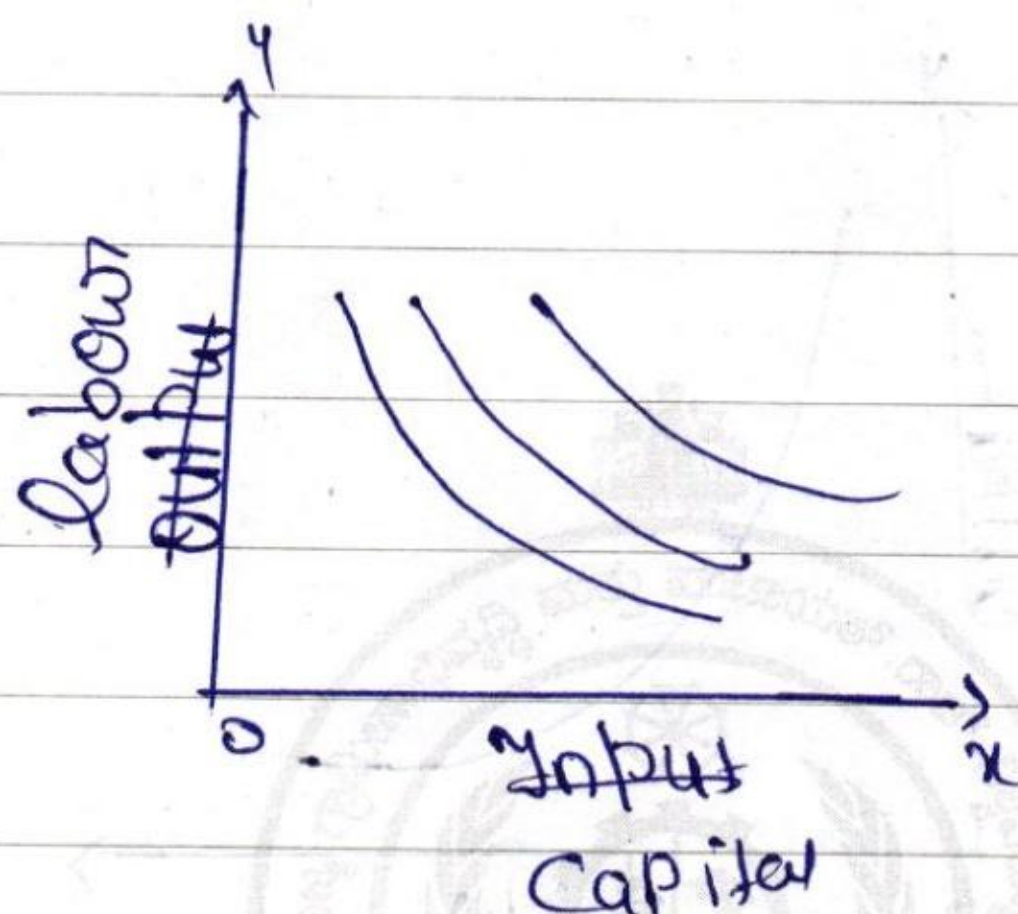

3. Isoquant curve provide higher level of satisfaction

(100)

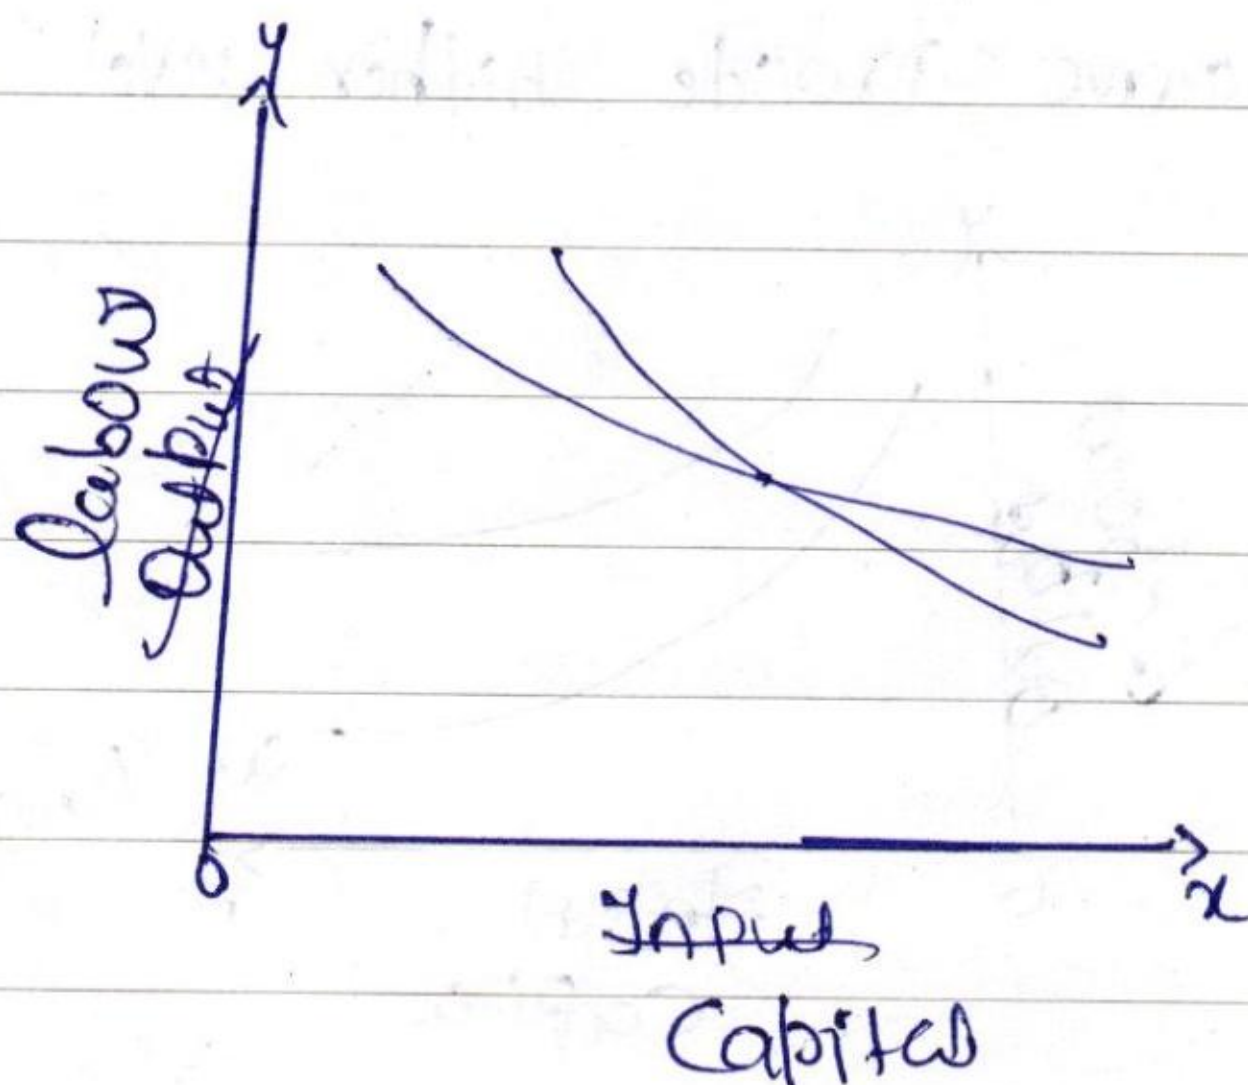

IQ_1 provide a higher level of Quantity
 IQ_2 provide a lower level of Quantity.

4. Isoquant not Parallel to Each other

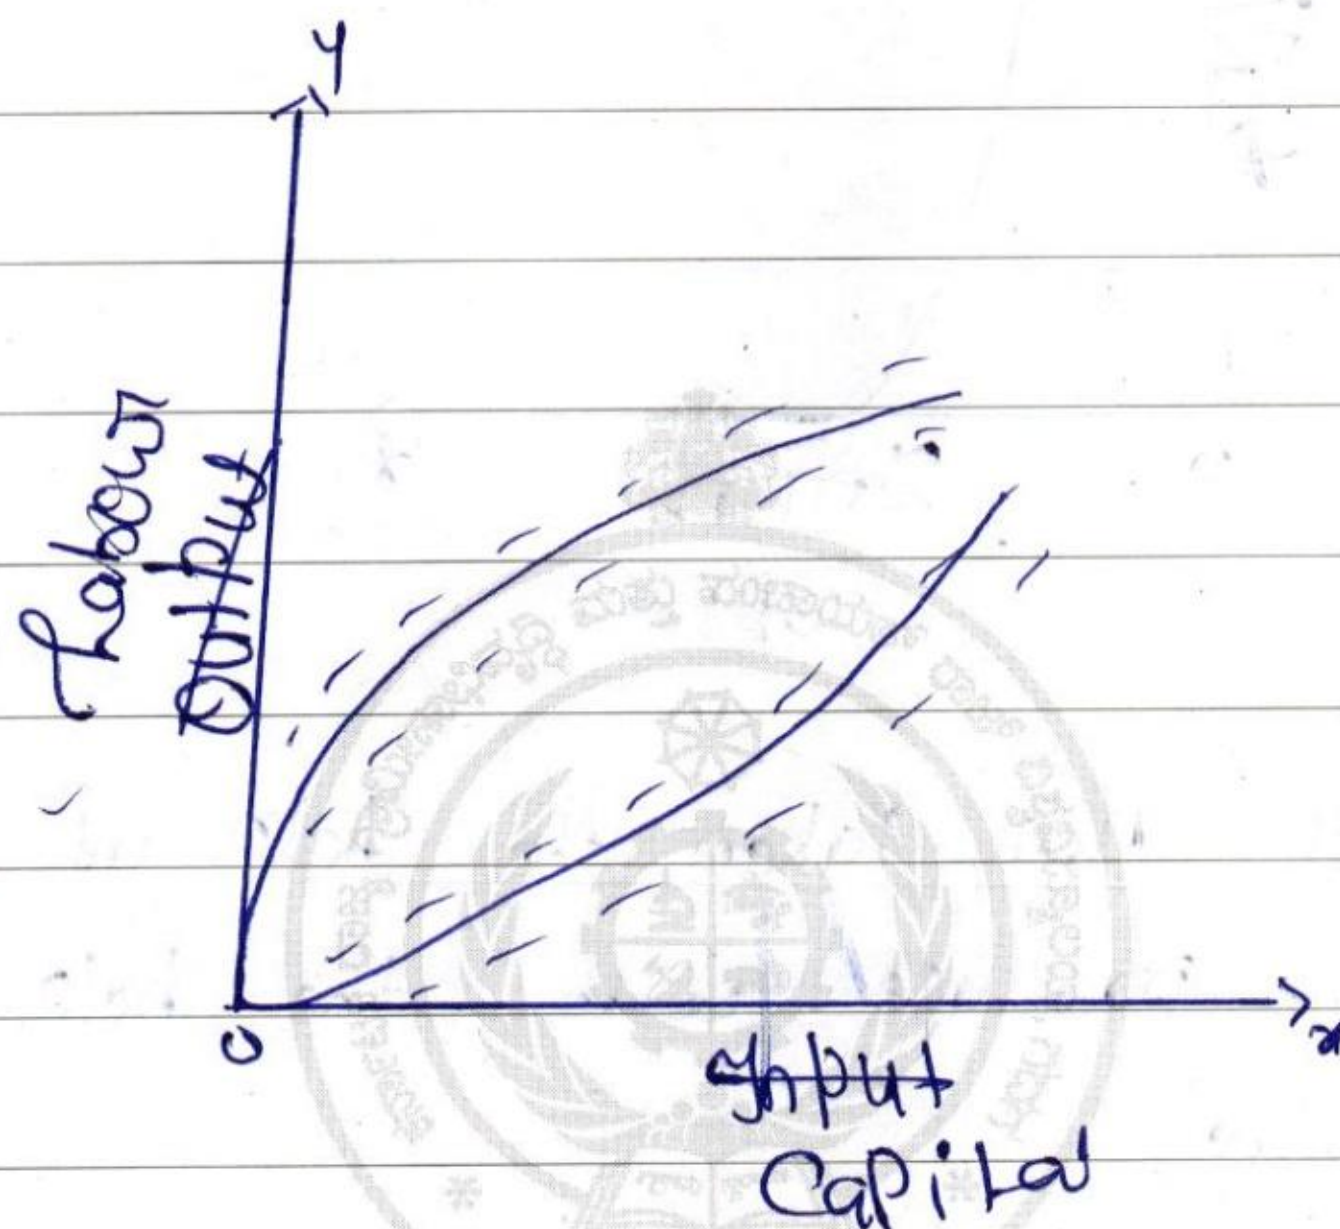

Sometimes it not necessary to be Parallel to Each other it is a rule of Economics.

5. Isoquant curve never intersect Each other

A single combination of inputs cannot produce the output so it never intersects each other.

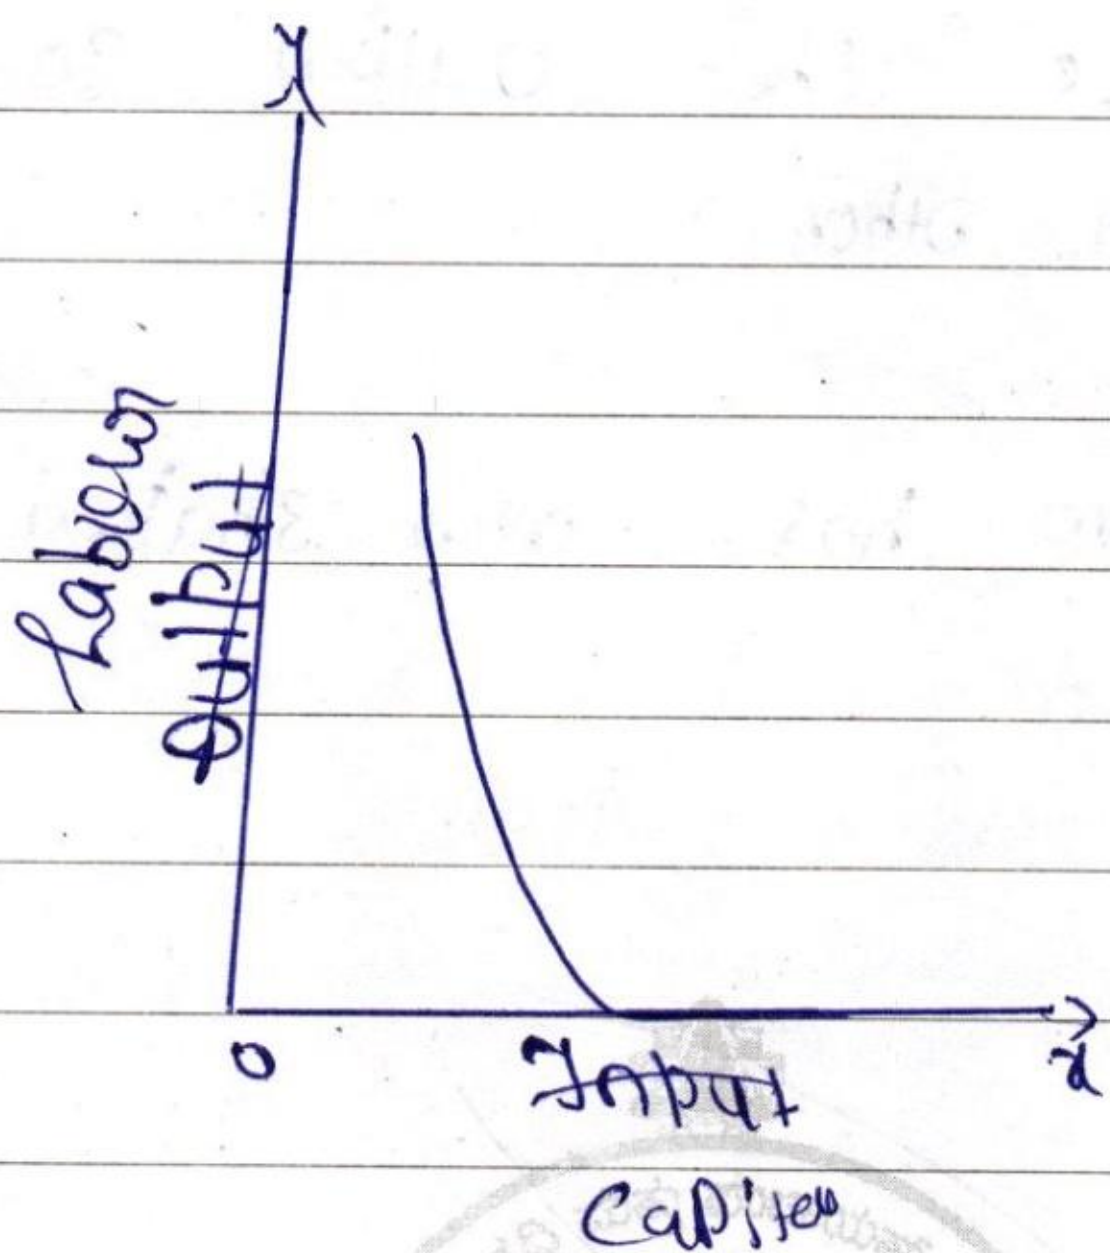

6. Isoquant curve has oval shaped.

The upper dotted area region, and down dotted is a capital unEconomics

The ridge of convex to the origin is the Economic.

9. Isoquant curve never touch a axis.

If not taken the help of the capital it produce with the help of a labour only.

11. Managerial Economics: It uses the principle of Economics to solve the business issues and aid to take decision making.

Scope of business economic

1. It is used in decision making process

Significance

1. Decision making process
2. Efficient use of resource
3. Satisfaction want.
4. Law of demand,
5. Pricing factor

1. Decision making process: All the decision is taken by the government by seeing the Economic situation of the country.

2. Efficient use of resource: The Economy tries to use efficient use of resource.

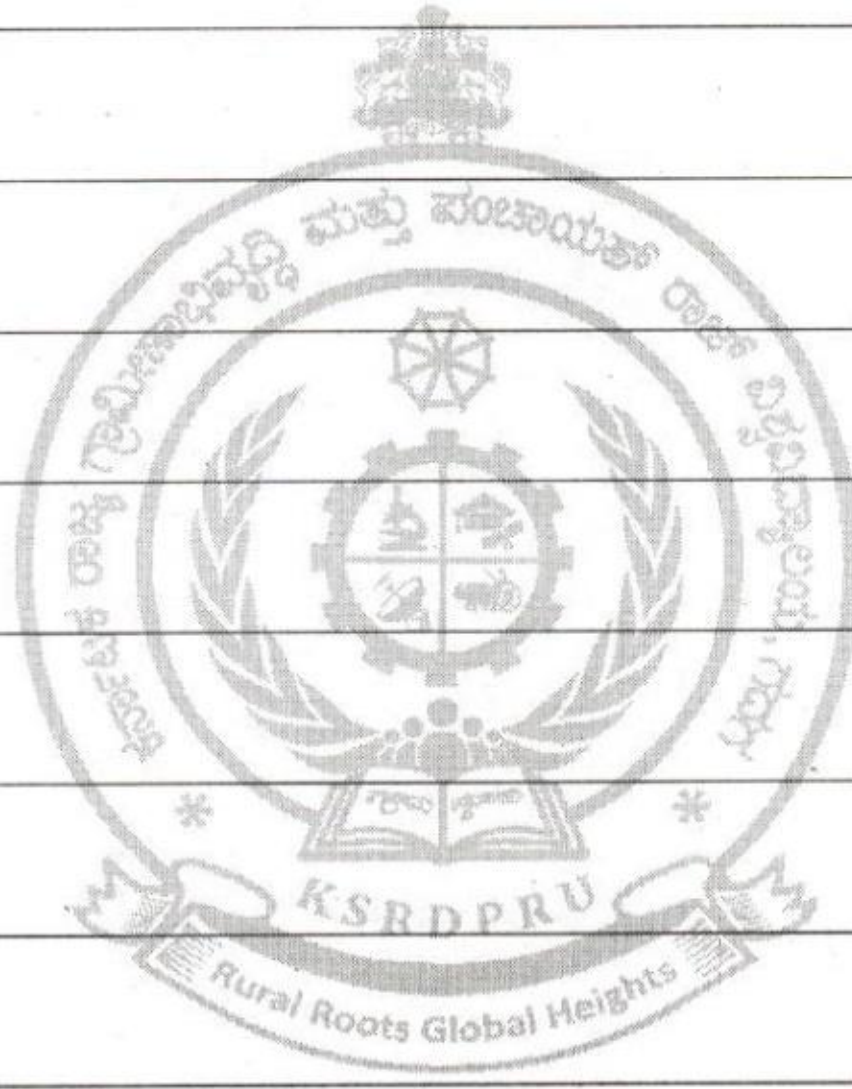

like land labour capital ~~or~~ etc.

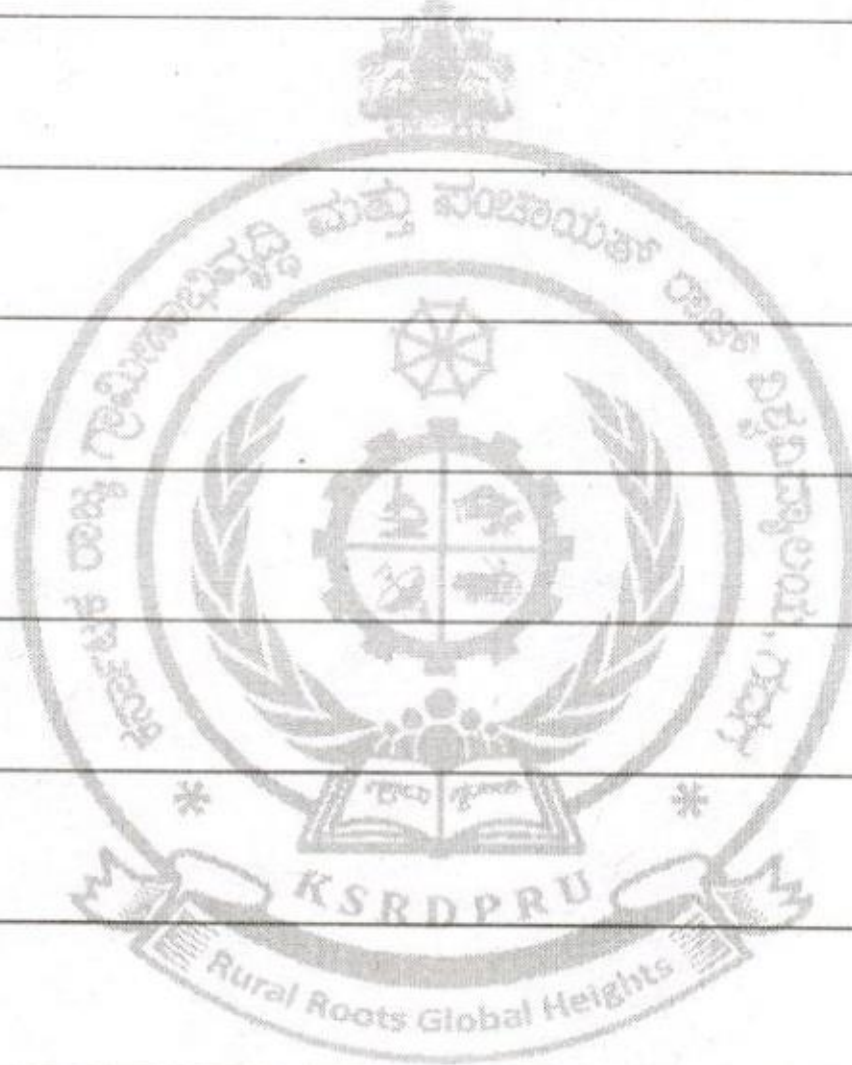

3. Satisfaction want : It satisfies the consumer want purchasing power of a commodity in satisfy the consumer need and want.

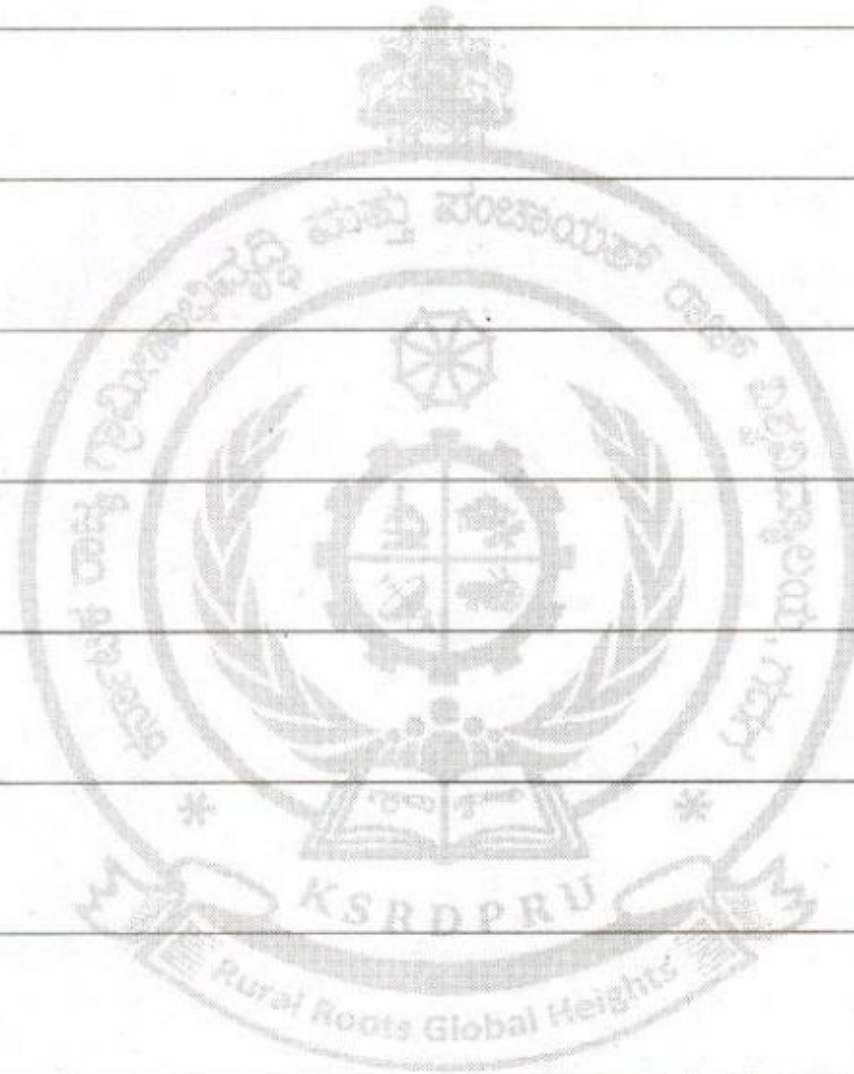

4. Law of demand : When the Price increase the demand decreases when the demand increase the price decrease it has negative slope between price and demand.

5. Pricing factor : here the price is distributed to goods as seeing the economic factor or economy of the country the price is decided.
