

INSTRUCTIONS TO CANDIDATES

1. **IMPORTANT** : CANDIDATES TO NOTE THAT ADDITIONAL SHEETS WILL NOT BE SUPPLIED AND CANDIDATES TO WRITE THEIR ANSWERS JUDICIOUSLY. CANDIDATES TO WRITE THEIR REGISTRATION NUMBER IN SPECIFIED SPACE ON FRONT PAGE ONLY. WRITING NUMBER OR NAME IN ANY OTHER PART OR MAKING SPECIFIC MARKS IS TREATED AS DELIBERATE ATTEMPT TO INFLUENCE EXAMINER AND WILL BE DEALT SERIOUSLY AS PER UNIVERSITY RULES(MALPRACTICE IN EXAMINATION).
2. Write on both sides. Do not write in the margin space.
3. Enter all details with Registration No., Programme, Semester etc. in the front page and do not write anything in any other space. Registration No. should be written legibly and shade the Corresponding circle in the OMR clearly with black/blue ball pen.
4. Candidates are required to put their signature and left hand thumb impression in the specified places.
5. No sheet shall be torn of from the answer-book provided, if any page is spoiled/damaged, put a line across it.
6. Do not leave any blank page between your answers. Answers written beyond blank pages may not be assessed, if by accident a page is left blank write on it "P.T.O" in bold letters.
7. At the end of the examination, answer-book whether written or blank, must be handed over to the Room Superintendent.
8. Nothing shall be written on the question paper or the blotting paper.
9. See that the answer-book supplied to you bear the signature of the Room Superintendent and date.
10. Write the question numbers (specifying the sub question, if any) in the margin and leave sufficient space after completion of answer to each question.
11. Exchange of writing materials, Communicating with other students, is strictly prohibited.
12. You will not be permitted to leave the examination hall until half an hour after the question papers are distributed.
13. During the last thirty minutes, you will not be allowed to leave the hall.
14. A Candidate is liable to be expelled from the examination hall and his/her case will be reported to the Registrar / Concerned officer of the University, if he / she
 - (i) Brings any book, notes, mobiles any electronic instruments etc., into the examination hall,
 - (ii) Speaks to or communicates in any other way with any other candidate while the examination is going on,
 - (iii) Or takes with him/her any answer-book written or blank or Question Papers, while leaving the examination hall during examination,
 - (iv) If found giving or receiving assistance, or copying from any paper book or notes or allowing any other candidates to copy from his/her answer book etc.
 - (v) Writes either on blotting paper or any other paper clues or points which might possibly be of help to any other candidates during the examination,
 - (vi) Uses or attempts to use in any other unfair means like smuggling in any other answer-book written outside or found guilty of impersonation,
 - (vii) Discloses his/her identity or makes peculiar marks in his/her answer-book,
 - (viii) Or uses abusive or obscene language or is guilty of any other misconduct of a serious nature.
15. A warning bell will be given ten minutes before the close of the examination. At the second bell, You must stop writing and be ready to hand over answer-book to the Room Superintendent. You must not leave your seat until all answer-books are collected by the Room Superintendent.
16. Candidates are forbidden to smoke or to take tea, coffee etc. In the Examination Hall, Drinking water will be supplied at the seat itself, if necessary.
17. Candidates who are not in their seats by the time notified, will not be admitted to the examination. The Chief Superintendent may however, at his discretion admit those who give him a satisfactory reason for the delay not exceeding 30 minutes after the commencement of examination.

19. Use either blue or black ink pen or ballpoint pen. Do not change the color of ink in any condition. In case you are compelled to change the color do not forget to take the signature of Room Superintendent explaining him/her the situation.

PART - A

(Answer any Five Divisions All divisions carry marks)

Q

Q) Define epidemiology

Epidemiology

→ epidemiology defined as dist health distribu
tion and determinants of health related
status ^{or} and events in a specific population
-s and applications of this studies and
control of health problems It is called
as epidemiology

→ epi -
→ among
→ logy

Health

→ Health is defined as complete physical, mental
and social ~~is~~ and spiritually not merely
absence of disease It is called as
Health.

Q List the disability indicators

→ disability It is defined as illness or sickness It is called as disability

Q Define Incidence and prevalence.

→ Incidence rate

Incidence It is defined as a "the measure of the number of new cases In a ~~specific~~ specific geographical area, and a given population and ~~for~~ during given period of time It is called as Incidence rate

Formula →
$$\frac{\text{NO of new cases during given period of time}}{\text{total population at risk}}$$

→ prevalence rate

prevalence rate is defined as "The new number of old and new cases" in a specific geographical area, and given population and during a given period of time. It is called as prevalence rate.

Formula →
$$\frac{\text{No of Current cases (old and new) during given period} \times 100}{\text{total population at risk}}$$

⑨ Define endemic, epidemic and pandemic disease.

→ endemic →

endemic defined as a ^{present} the number of disease in a specific geographical area, and given populations. It is called as endemic.
ex → malaria.

→ epidemic

epidemic defined as a "the number of disease present suddenly increasing the same disease in a specific geographical area and given during

given ~~per~~ population It is called as epidemic

ex → malaria.

pandemic

→ pandemic It is defined as a "the number disease ~~ex~~ spreads through the countries to countries disease spread (wild war) It is called as pandemic

ex → Covid-19 Corona.

(d) Define risk factors Given examples

→ risk factors

→ at a particular disease, disease spreads ~~of~~ ^{In a} specific geographical areas and given population and during a given period of time It is called as risk factors

Example → malaria, dengue, Bacteria, Covid-19,

① what is Case Fatality Rate (CFR)

→ Case Fatality rate

Case fatality rate It is defined as "the number ~~new cases~~ death rate ~~It is~~ called as Case and It is ~~case~~ ~~case~~ Identification ~~of~~ It is called as case Fatality Rat (CFR)

Formula →
$$\frac{\text{No of}}{\text{total population at risk}} \times 1000$$

PART - B

(Answer any four questions carry equal marks)

② Describe the Epidemiologic triad with suitable examples

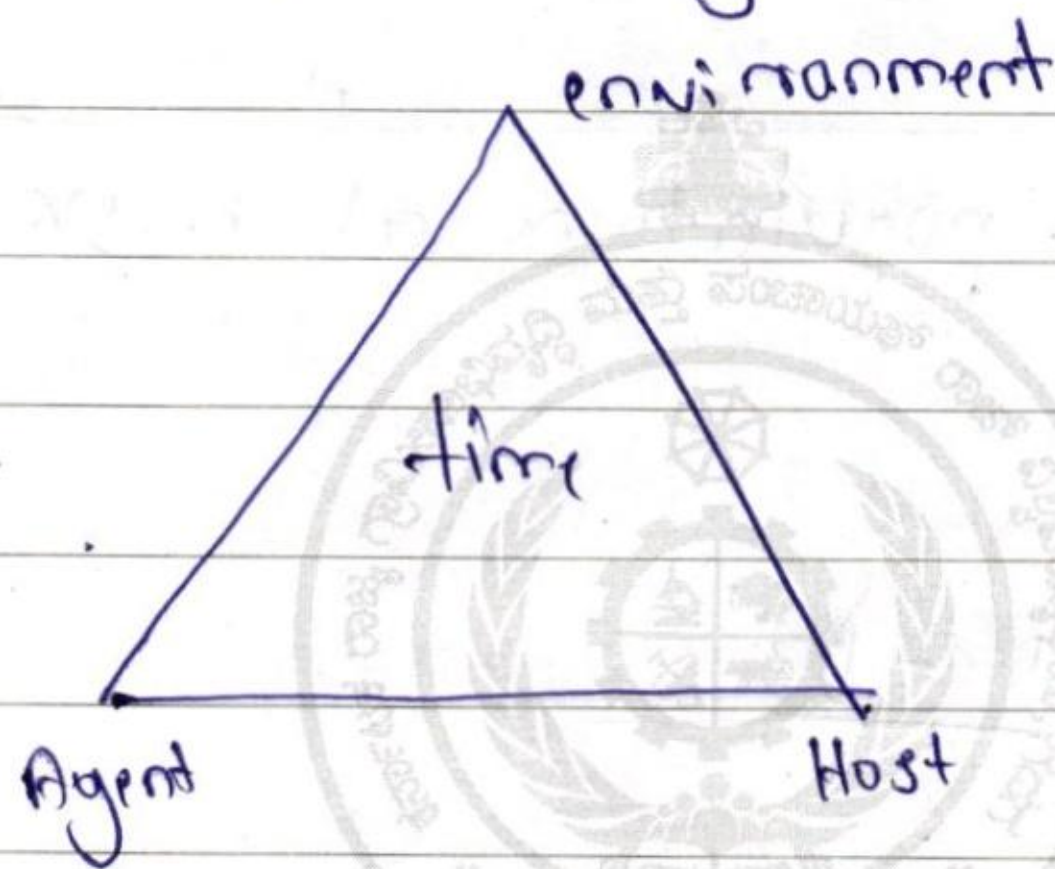

→ epidemiology

epidemiology defined as a ~~no~~ distribution and determinants of Health ~~near~~ Health related status or events In a specific ~~geographical~~ ~~area~~ populations and application of this

Studies to control of Health problems.
It is called as epidemiology

Epidemiologic triad

→ Epidemiologic triad It is relationship between Agent, Host, environment It is called as epidemiologic triad.

→ Agent →
Agent → It is a (agent) caused by the disease

Agents factors

- ① Nutritional factors
- ② Biological factors
- ③ Chemical factors

- (a) physical factors
- (5) social factors
- (B) environmental factors

(1) ~~Not~~ Biological factors → virus, fungi, bacteria, protozoa

(2) Nutritional factors → vitamins, minerals, and malnutritions

(3) chemical factors → also alcohol, smoking, and chemical exposures

→ Host → Host is ^{usually} caused by (humans and animals)

→ environment →

→ environment It is a related between population and elites and It is called as environment

environment factors

- (1) Biological factors (virus, bacteria)
- (2) physiological factors (air, water, noise,

→ (1) Biological factors → ~~It is caused by~~
(animal and insects)

→ dog bites caused to Rabies
 → mosquito bites caused to malaria,
 Dengue

Physiological Factors → It is related between
 air, water, noise (air ~~pollution~~ populations caused
 to Respiratory problems and water pollution
 caused to, diarrhea, and noise populations
 caused to ear problems. It is called as
 physiological factors.

→ Time →

③ explain the measures of mortality and
 Importance public Health.

→ measures of mortality

→ measures of mortality ~~It is~~ ^{the} a measure
 of "the number of death rate" a given
 -ng given population and during a given
 period of time It is called as mortality
 (How many peoples are death)

→ public Health

→ public Health defined as preventing the disease, and prolonging a life and promoting of Health It is called as public Health.

Importance of public Health

- ① Health education
- ② Health policy
- ③ malnutrition
- ④ social - economical cultural.
- ⑤ Healthy life style
- ⑥ disease prevention and control.

→ measures of mortality

→ measures of mortality ~~It is~~ ^{It is} a measures of 'the number of death rate' during given population and during a given period of time It is called as measures of mortality rate (How many peoples are death)

Formula →
$$\frac{\text{Total no of death rate during a given period of time}}{\text{Total mid-year population}} \times 1000$$

$$\Rightarrow \frac{800}{100000} \times 1000$$

$$= 8.$$

= 8 people death per 1000 population per one year.

→ measures of mortality including a

→ crude death rate (CDR)

→ specific death rate (SDR)

→ Infant mortality rate (IMR)

→ ~~maternal~~ ^{maternal} measures of mortality rate (MMR)

→ Death rate

→ Birth rate

→ case Fatality Rate (CFR)

(i) Death rate

→ Death rate defined as the measure of number of death rate during given period population and during given period of time. It is called as Death rate.

→ Crude death rate (CDR)

→ Crude death rate It is defined as the measure of number of (all cases) death rate at ~~during given period~~ ^{of population} and ~~during given of~~ ^{estimates} the per 1000 population per 1 year.

data 1

Formula →
$$\frac{\text{No of (all cases) during a one year} \times 1000}{\text{total mid year population}}$$

→ Specific death rate

→ specific death rate It is defined as the measure of (specific disease identification of disease) It is called as specific death rate)

ex- TB (Tuberculosis)

Formula →
$$\frac{\text{total no of (Tuberculosis TB) ^{direct} identification of} \times 1000}{\text{total mid year population}}$$

④ write a short note on determinants of Health

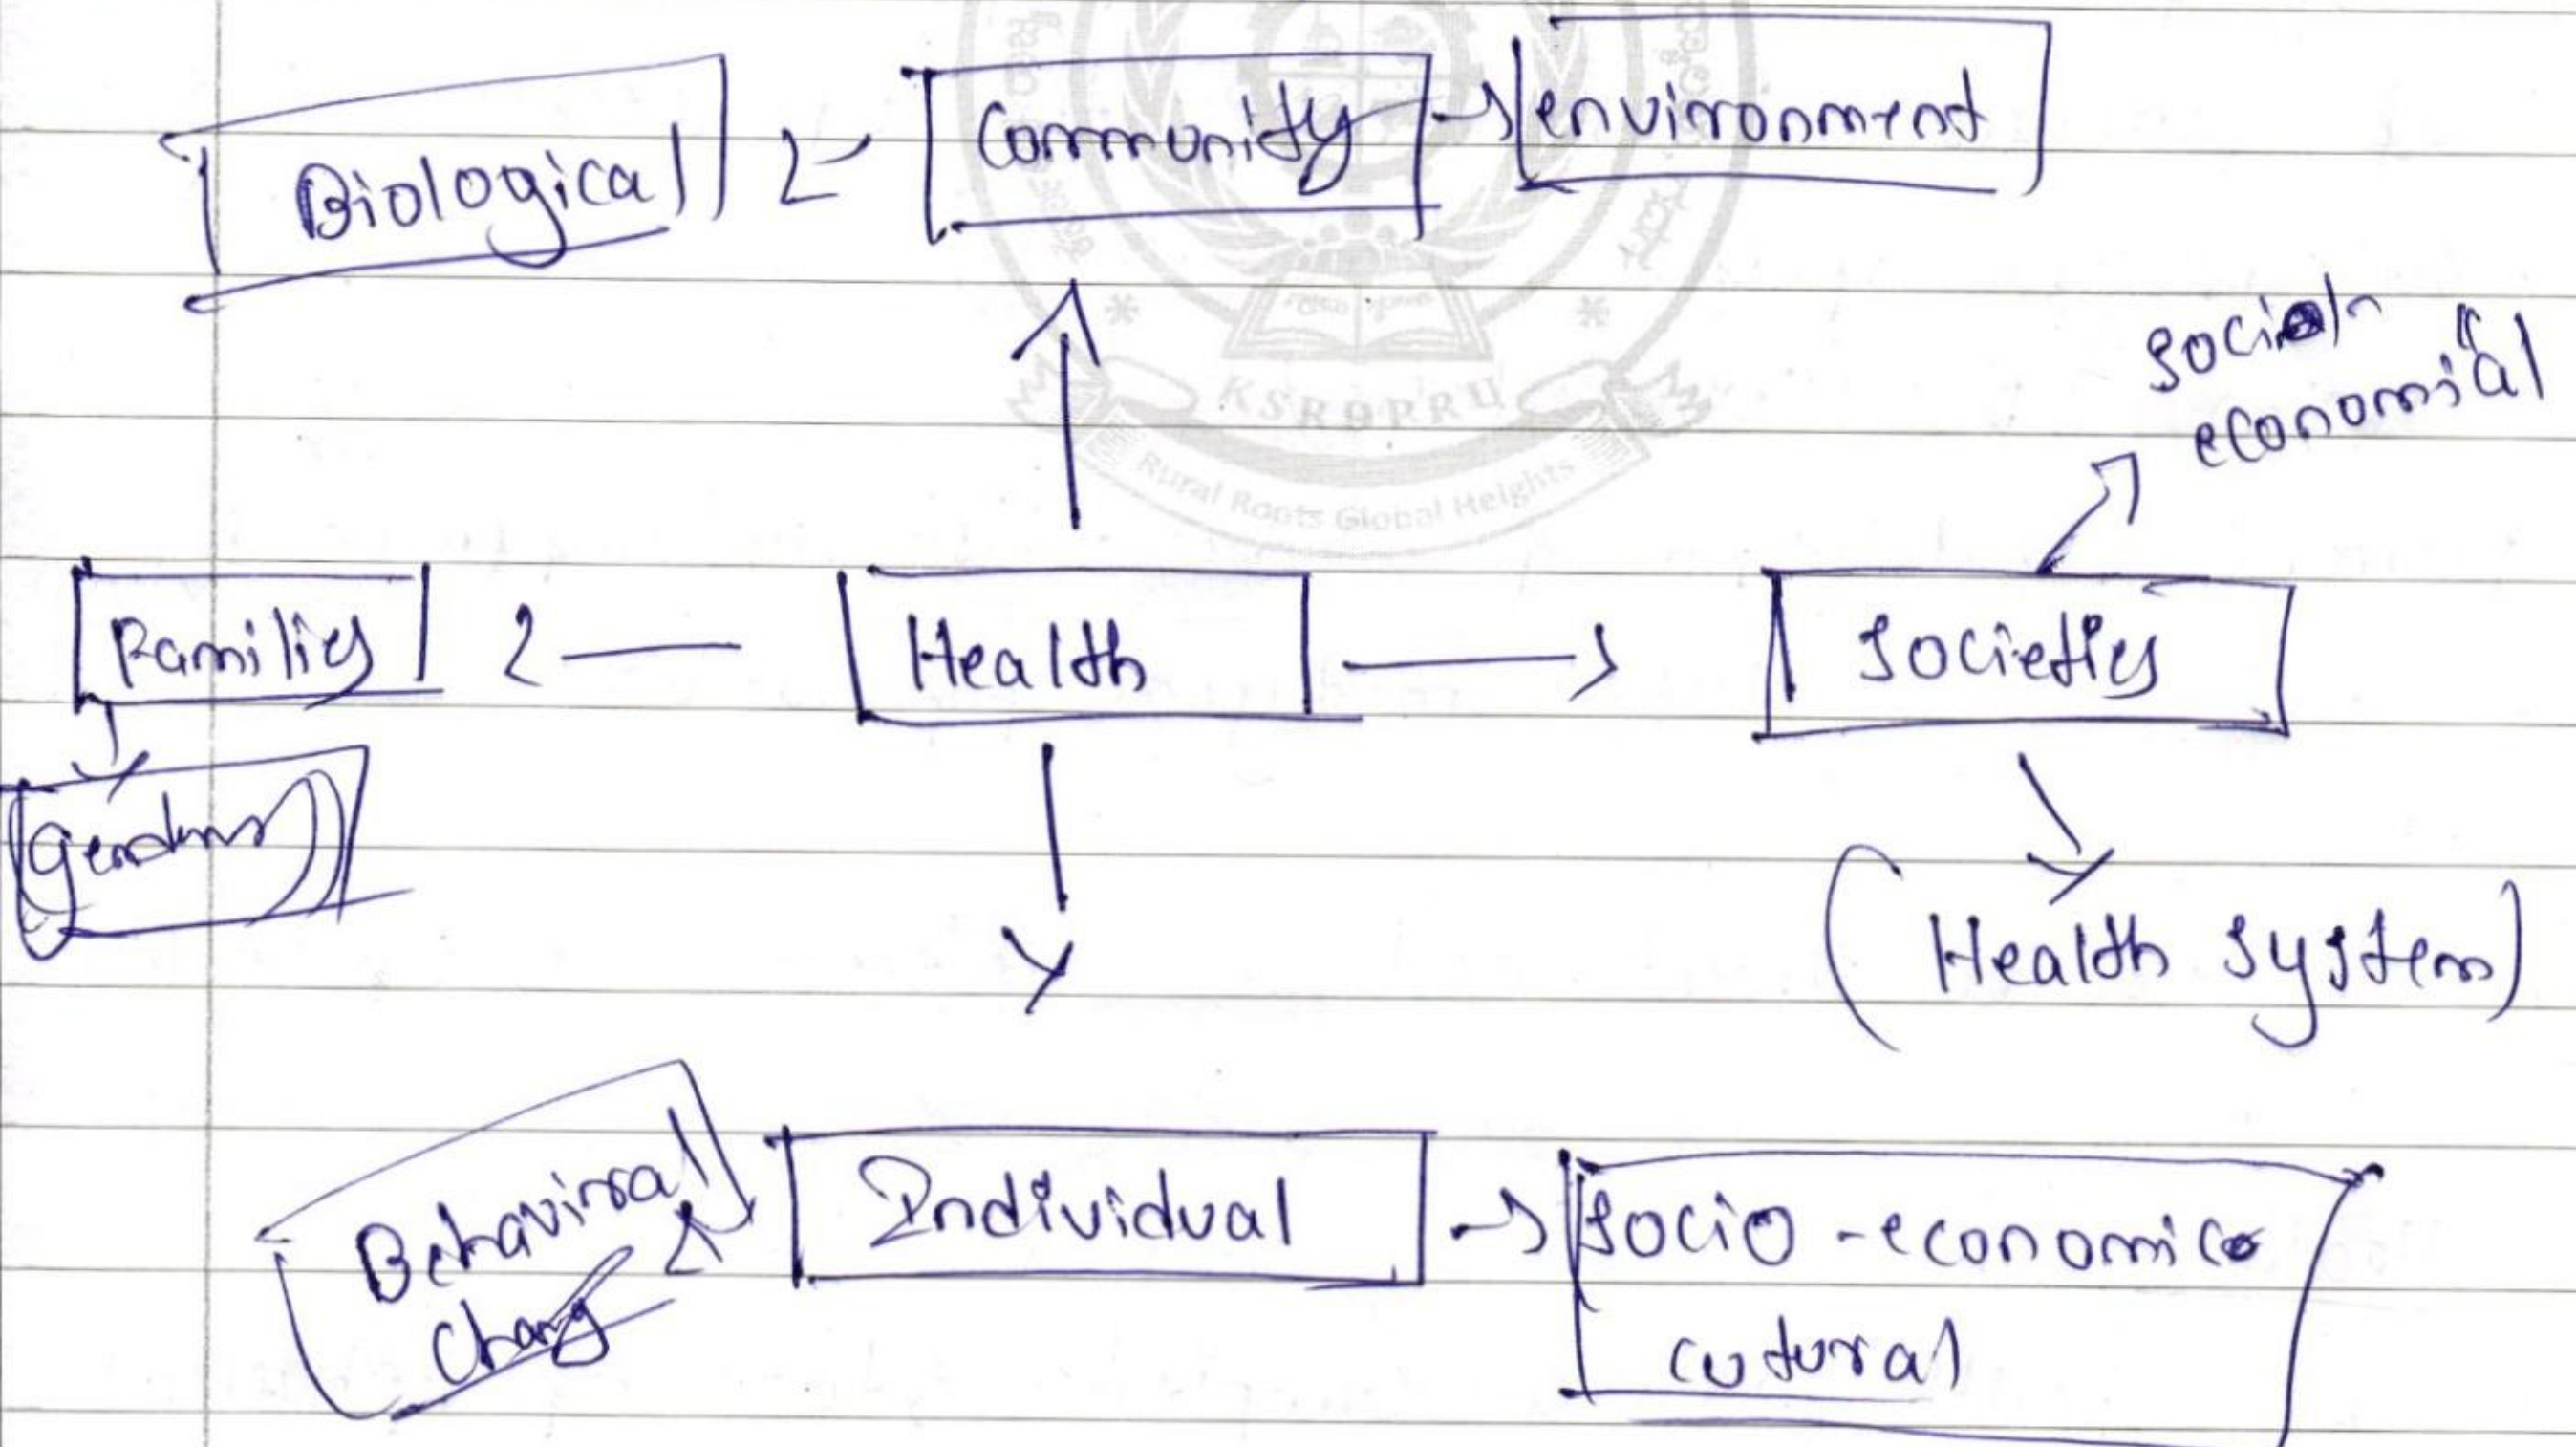

→ Health

Health is a complete state of, physical, mental, social and spiritual well being not merely absence of disease It is called as Health.

Determinants of Health

→ Determinant of Health

→ Determinant of Health It is defined as Health factors including a Biological and ~~Root~~ determinat of Health and environmenta determinants of Health and Behavioural Socio-economical conditions, Behavioural-social cultural conditions, and Health care services and other Determinants of Health It is called as Determinant of Health.

29893

② Determinants of Health

- ① Biological Determinant of Health
- ② environment Determinant of Health
- ③ Socio - economic conditions
- ④ Behavioural - socio economic cultural condia^{tions}
- ⑤ Health care services
- ⑥ other Determinants of Health

① Biological Determinant of Health

① > Biological Determinant of Health It is a related to cell, and organs, and system of the human body It is called as Biological Determinant of Health

→ Age — Genetic
 → age
 → sex

Genetic → If your parents suffering of major disease like diabetes and hypertension

(Op) If your body suffering from future

→ age →

→ sex → Breast Cancer for women.

② environmental Including a → (air, water, noise)

→ environment It is a related between (air, water and noise) pollution and climate)

→ physical environment

→ Biological environment

→ physical environment

→ It is related between (air borne disease water, and noise) air pollutions caused by a Respiratory tra. problems and water pollution caused by diharria and noise pollution caused by a ear problems.

→ Biological environment.

① It is related to animals and insects

→ dog bites caused to Rabbits

→ mosquitoes bites caused to malaria, Dengue

③ Health care services

→ the developing Hospital.

→ Health care services

→ safe drinking water

→ safe hospital management

→ Doctor facility

→ Immunization care.

29893

(u) Behavioural - Socio economical Culture

→ Depending upon Socio economical conditions and life style and economic conditions and they are culture

Depending upon Socio economic

(rich or poor)

Depending upon Cultural
(Vegetarian — non veg)

Depending upon social status
(Kusuman status)

Depending on personal habits
(Smoking, Alcohol, and tobacco, etc.)

✱ write in detail about herd immunity with examples

→ Immunity It is defined as Immunity
It is a ability of the body and resist
of the microorganisms like bacteria, fungi
and etc.

⑤ Explain bias and Confounding In epidemiologic Studies with examples

→ epidemiology

→ epidemiology It is defined as a study distribution and determinant of health related states and events in a specific population and application of this studies control health problems It is called as epidemiologic studies.

PART - C

→ Answer any three questions All quest

PART - C

- (a) Define Health Indicator and its uses
Classifications and ~~use~~ discusses DMR and mmr

→ Health Indicator

Health is a state of complete physical, and mental, social, and spiritual well-being not merely absence of disease. It is called as Health Indicators.

then, Health Indicator

- (1) mortality Indicators (Crude death, ^{mortality} Infant rate)
- (2) morbidity Indicators (Incidence, prevalence)
- (3) Health policy
- (4) Health education
- (5) Nutrition
- (6) malnutrition
- (7) Disability
- (8) Nutritional status

(9)

(1) mortality Indicator

→ mortality Indicator It is defined as a
"the number of death rate at particula

-area and during given period time and during given population

→ Crude death rate

→ Specific death rate

→ Infant mortality rate

→ maternal mortality rate

→ Case fatality rate

→ morbidity Indicator

→ morbidity Indicator It is defined as an any disturbance of the disease and physiology -cially well being including, illness, sickness, disability, and It is called as morbidity Indicator

→ Incidence rate

→ prevalence rate

① Incidence rate

→ ~~It~~ Incidence rate It is defined as the "the number of new cases in specific population and specific geographical area"

and during given period of time.

① Prevalence rate

prevalence rate It is defined as 'the number of old and new cases in specific geographical area and specific population and during a given period of time. It is called as prevalence rate.'

Discuss IMR and MMR

IMR

→ Infant mortality rate

→ It is defined as the number of (0-1 year) body. It is called as Infant mortality rate.

→ MMR

→ maternal mortality rate.

① It is defined as the number of pregnant women. It is called as maternal mortality rate.

(12) explain the natural history of disease and level of prevention.

→ level of prevention

- | | | |
|-----|------------|------------|
| (1) | periodical | prevention |
| (2) | primary | prevention |
| (3) | secondary | prevention |
| (4) | Tertiary | prevention |

(1) periodic preventive

(2) mode of Interventions

(1) primary prevention → Health promotion
-and specific protections

(2) secondary prevention → early diagnosis and treatment

(3) Tertiary prevention → disability limitations and rehabilitations.

Natural history of disease

① Natural history of disease It is complex and Interaction between a agent, man (the causes of disease) host It form of the natural history of disease at key concept of natural history of disease It is called as natural history of disease.

Components of natural history of disease

② There are two many components of natural history of disease the form → 2 phase

① pre-pathogenesis phase

② pathogenesis phase

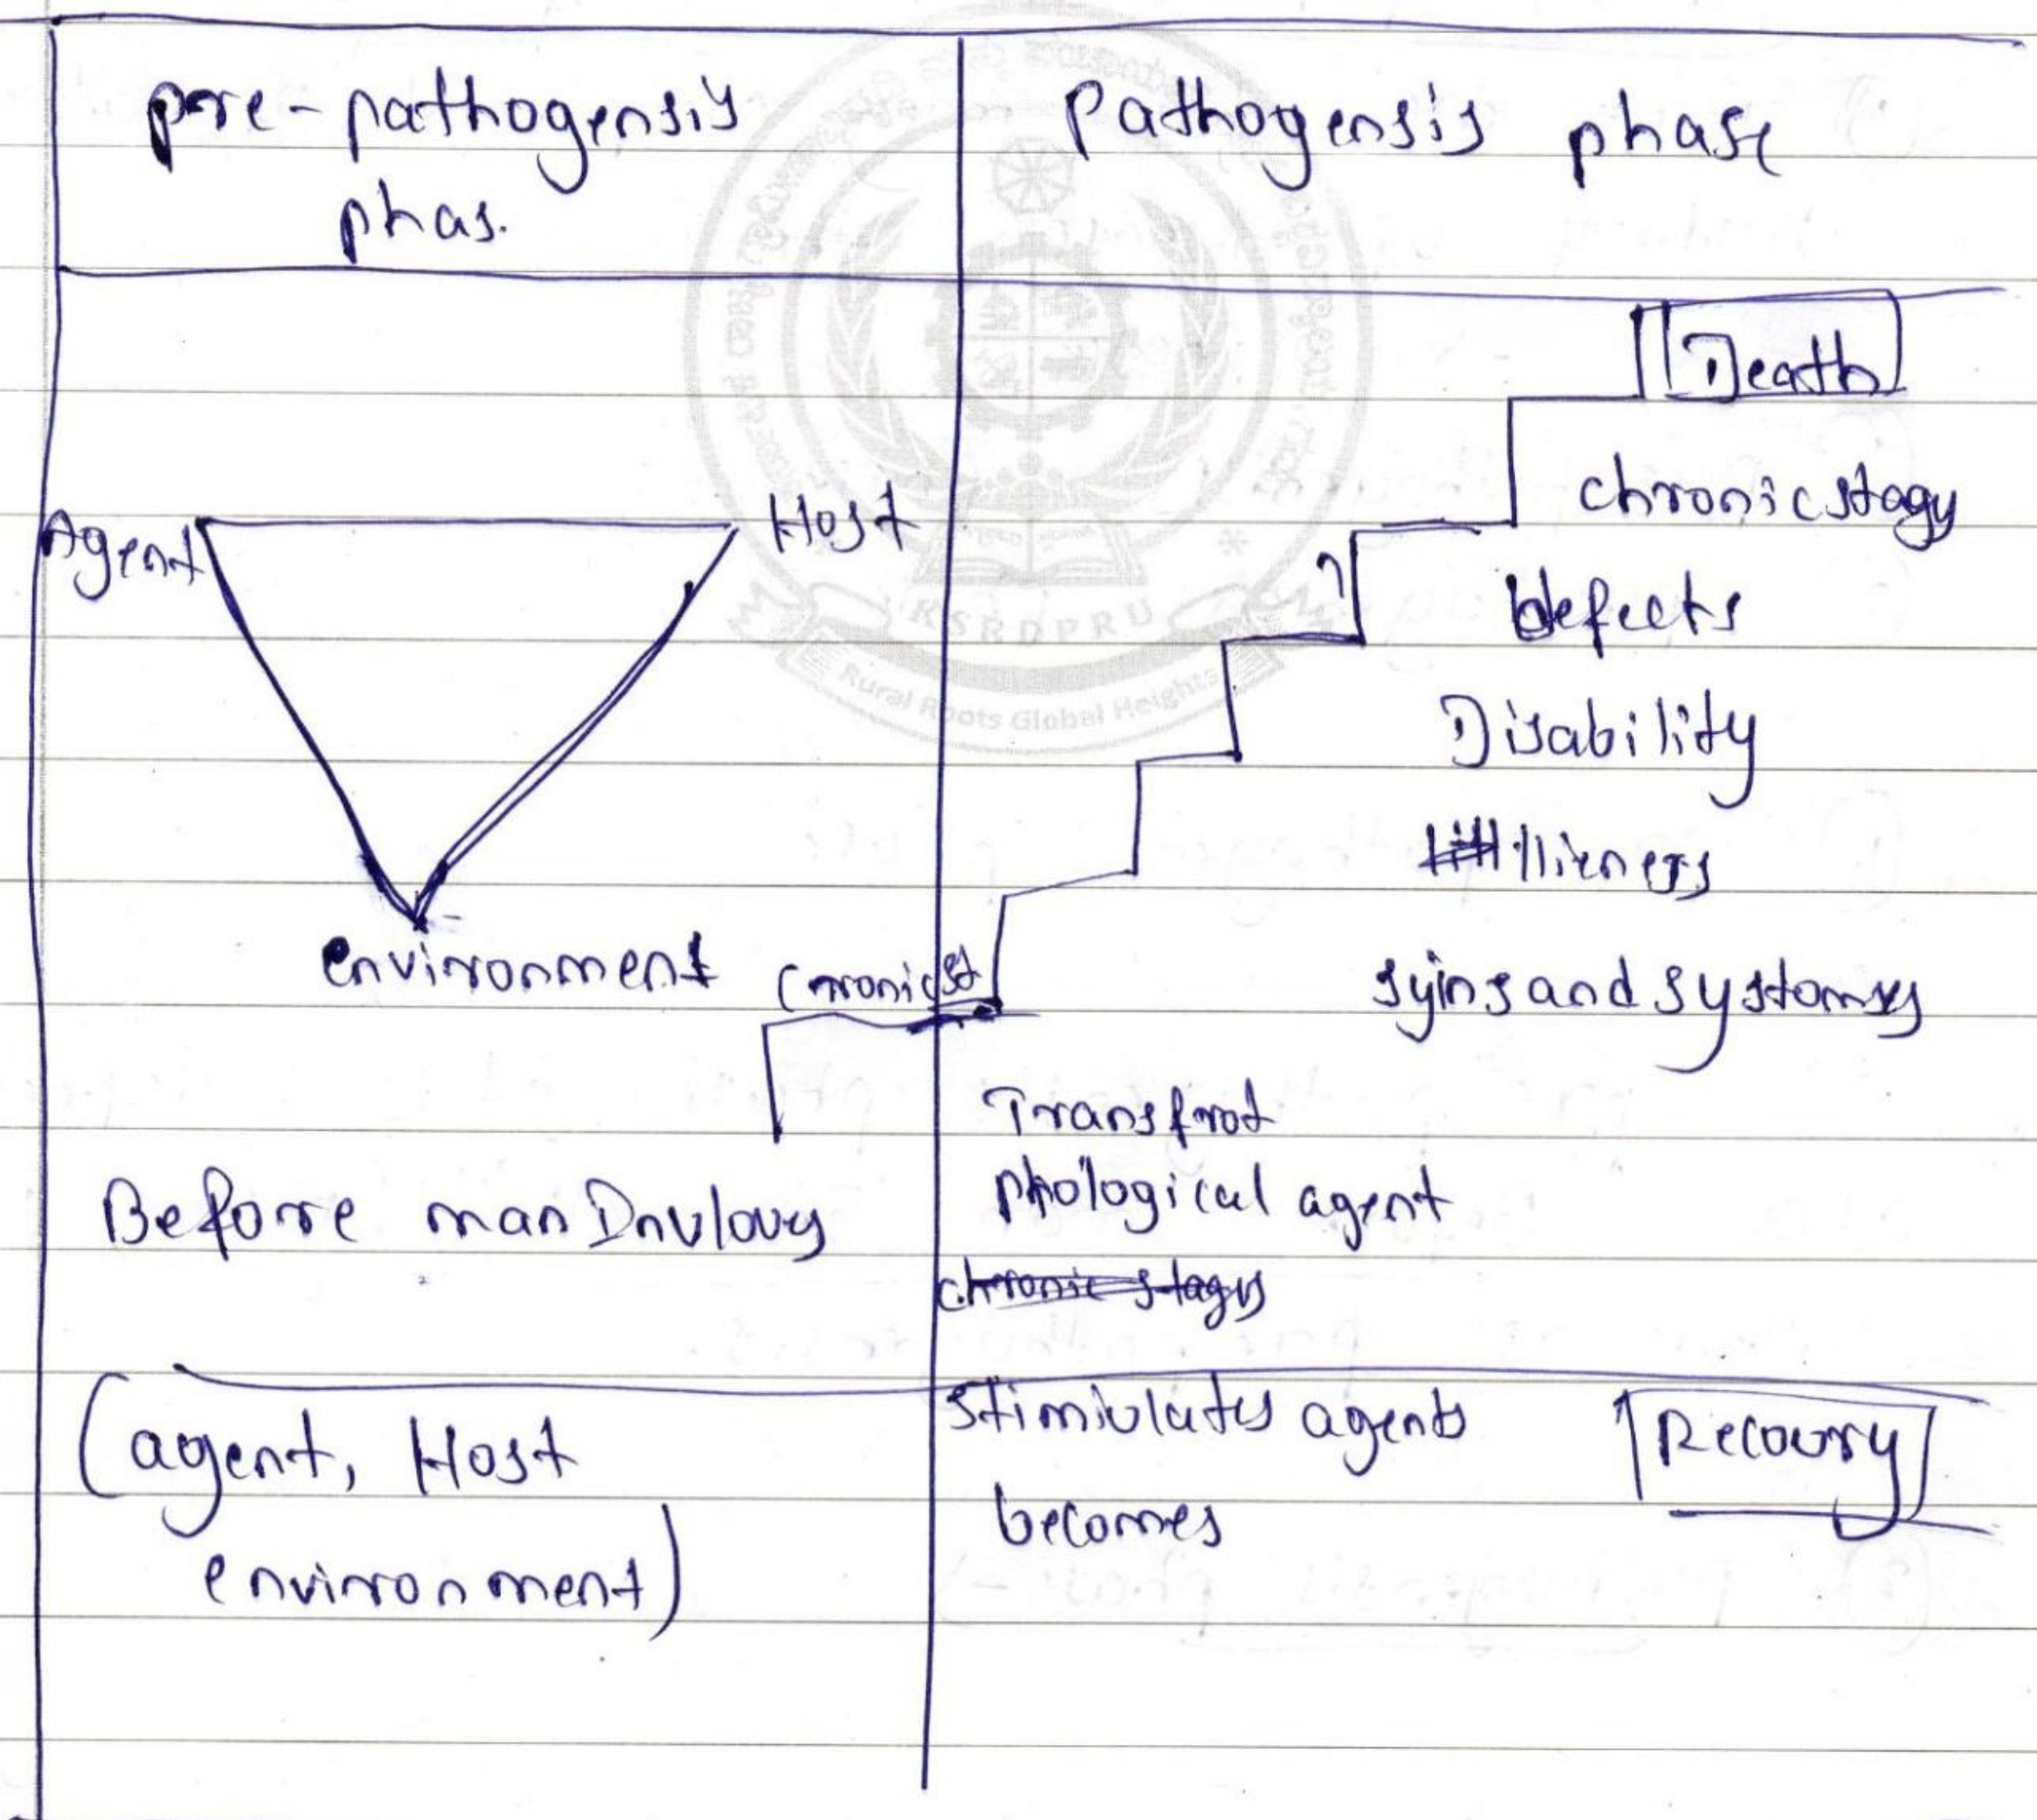

① pre-pathogenesis phase

→ pre pathogenesis phase It is defined as a Before man In wall (disease) It is called as pre pathogenesis.

② pathogenesis phase →

→ pathogenesis phase

pathogenesis phase defined as a ~~any~~
 "The causes of the disease in man"
 (disease) It is called as pathogenesis

primary prevention

mode of Interventions		
primary prevention	secondary prevention	tertiary prevention
Health promotion and specific protection	early diagnosis and treatment	disability limitation and rehabilitation

(ii) Discuss the steps involved in investigating an epidemic (outbreak)

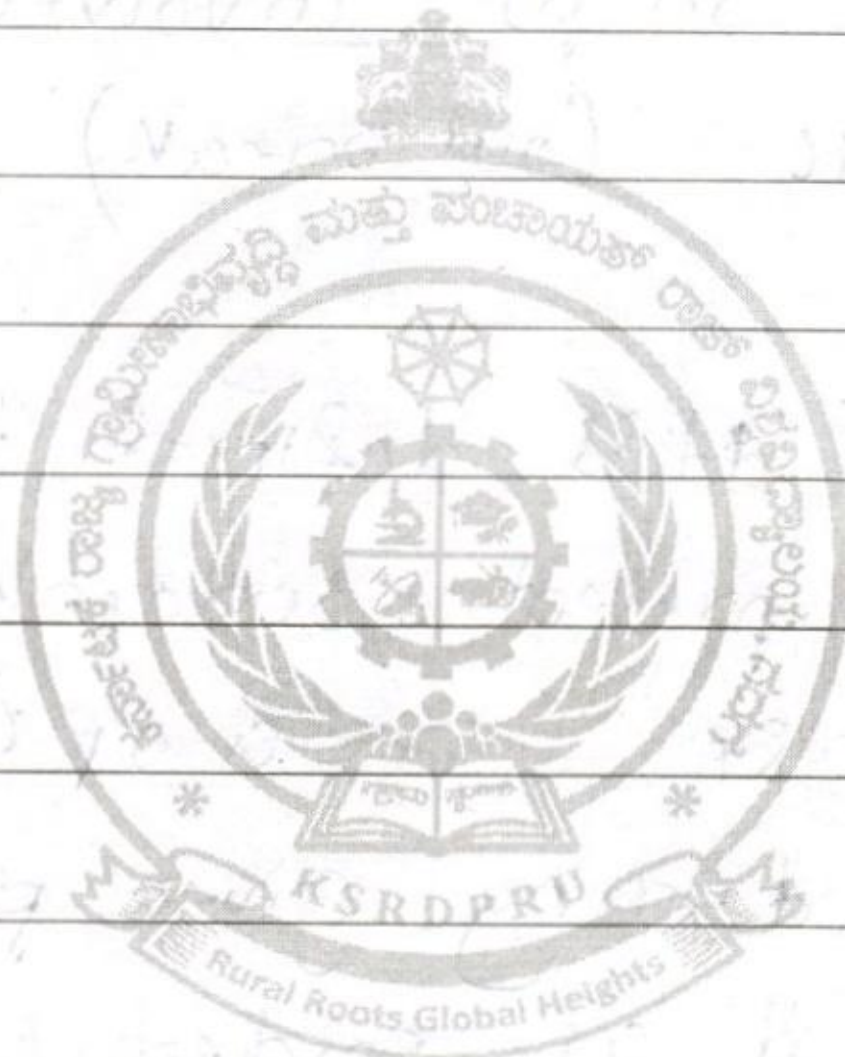

→ epidemic It is defined as a "the number of disease present suddenly increasing the same disease in a specific geographical area and during given period population. It is called as epidemic"

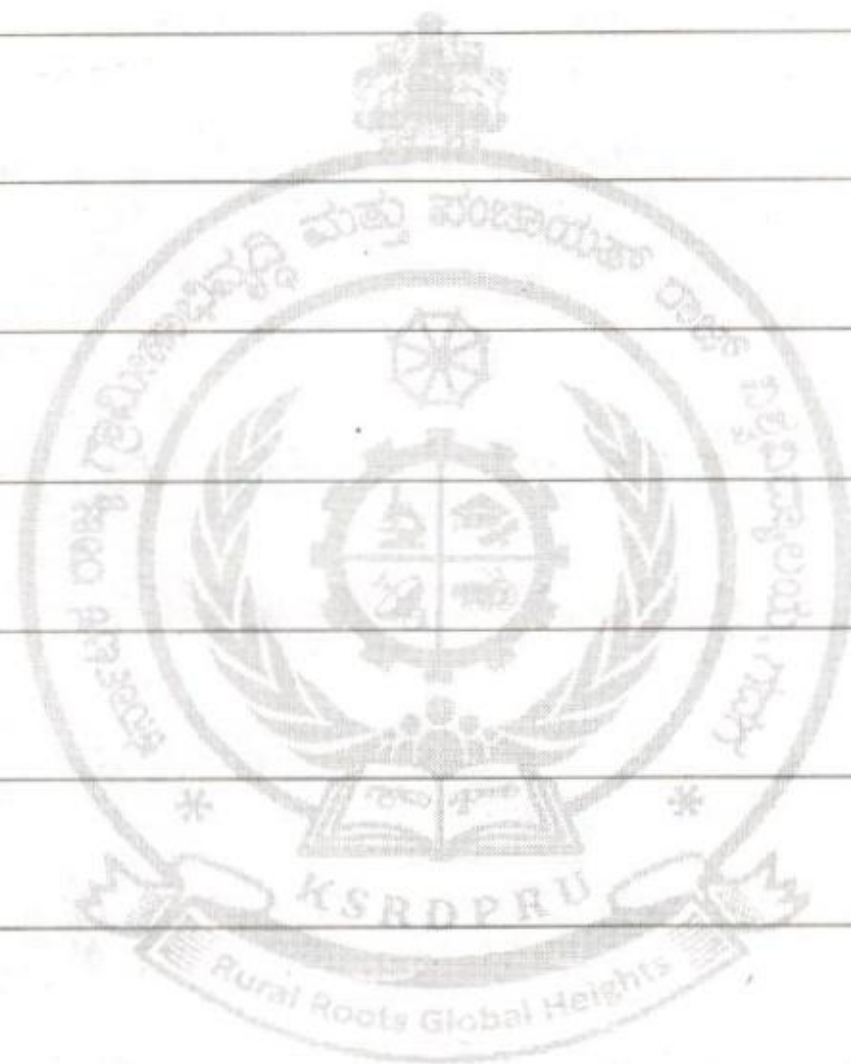

ex → malaria

→ ~~Corona~~ Corona (Covid-19)

→ Involved in investigating an epidemic (outbreak)

(+) endemic → conditions should have with them on all days days of examinations their Admission of Card for inspection.
